## Released Items Provincial Achievement Test 2010 and 2011

## Knowledge and Employability Mathematics

This document contains released items from the 2010 and 2011 Grade 9 Knowledge and Employability Mathematics Achievement Tests.

A test blueprint and an answer key that includes the difficulty, reporting category, curricular content area, and item description for each test item are also included. These materials, along with the program of studies and subject bulletin, provide information that can be used to inform instructional practice.

For further information, contact
Ray Shapka, Senior Manager, Knowledge and Employability, at Ray.Shapka@gov.ab.ca; or
Nicole Lamarre, Director, Student Learning Assessments and Provincial Achievement Testing, at Nicole.Lamarre@gov.ab.ca at the Provincial Assessment Sector, or call 780-427-0010. To call toll-free from outside Edmonton, dial 780-310-0000.

## 2010 and 2011 Achievement Test Released Items

The items presented in this document are from the secured 2010 and 2011 Grade 9
Knowledge and Employability Mathematics Achievement Tests. These items are released by Alberta Education.

# Grade 9 Knowledge and Employability Mathematics Achievement Test Released Items 2010 and 2011 

Use the following information to answer question 1.
Lisa has a bowl of gumdrops that are all the same size. The bowl contains the following different colours of gumdrops.

- 6 green
- 5 red
- 4 orange
- 5 yellow

1. Which colour of gumdrop is Lisa most likely to randomly pick from the bowl after first picking a red gumdrop and then an orange gumdrop?
A. Red
B. Green
C. Yellow
D. Orange

Use the following chart to answer question 2.

| David's <br> Work Week | Hours <br> Worked |
| :--- | :---: | :---: |
| Week 1 | 27 h |
| Week 2 | 32 h |
| Week 3 | 40 h |
| Week 4 | 41 h |
| Total hours | 140 h |

2. What is the average number of hours that David worked per week?
A. 28 h
B. 35 h
C. 56 h
D. 70 h

Use the following information to answer question 3.
Emma's swimming schedule follows a pattern, as shown in the calendar below.

| , JULY |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Monday | Tuesday | Wednesday | Thursday | Friday | Saturday |
|  | $\begin{array}{\|l\|} \hline 1 \\ \text { swimming } \end{array}$ | 2 | $\begin{aligned} & 3 \\ & \text { swimmine } \end{aligned}$ | 4 | $\begin{array}{\|c\|} \hline 5 \\ \text { swimming } \end{array}$ | 6 |
| 7 | 8 | $9$ <br> swimming | 10 | $\begin{array}{\|l\|l\|} \hline 11 & 1 \\ \text { swimming } \end{array}$ | 12 | 13 |
| 14 | 15 <br> swimming | 16 | $\begin{aligned} & 17 \\ & \text { swimming } \end{aligned}$ | 18 | $\begin{array}{\|l\|} \hline 19 \\ \text { swimping } \end{array}$ | 20 |
| 21 | 22 | 23 SWimMing | 24 | $\begin{array}{\|l\|l\|} \hline 25 & 2 \\ \text { swimming } \end{array}$ | 26 | 27 |
| 28 | 29 swimming | 30 | $\begin{aligned} & 31 \\ & \text { swimming } \end{aligned}$ |  |  |  |

3. Which of the following statements best describes the pattern of Emma's swimming schedule?
A. She swims every weekday.
B. She swims every second day.
C. She swims every second day one week and every third day the next week.
D. She swims Monday, Wednesday, and Friday one week, then Tuesday and Thursday the next week.

Use the following information to answer questions 4 and 5.
Kris buys popcorn before he watches a movie. The price list for the popcorn is shown below.

| Popcorn |  |
| :--- | :---: |
| Size | Price |
| Small $(200 \mathrm{~g})$ | $\$ 3.50$ |
| Medium $(400 \mathrm{~g})$ | $\$ 4.25$ |
| Large $(600 \mathrm{~g})$ | $\$ 5.50$ |
| Extra butter | $\$ 0.75$ |
| All prices include GST. |  |

4. How many small bags of popcorn equal 1 kg ?
A. 2
B. 3
C. 4
D. 5
5. The total cost of 2 small bags of popcorn without extra butter and 1 large bag of popcorn with extra butter is
A. $\$ 13.25$
B. $\$ 12.00$
C. $\$ 9.25$
D. $\$ 8.50$
6. If a car can travel 550 km on 55 L of gasoline, then how far can it travel on 1 L of gasoline?
A. 5 km
B. 10 km
C. 50 km
D. 55 km

## Use the following information to answer question 7.

A student wants to determine the mass of a bag of oranges.
7. Which of the following units would be appropriate for measuring the mass of the oranges?
A. Feet
B. Yards
C. Litres
D. Kilograms

Use the following information to answer question 8.

A soccer league is raising funds for new equipment. Each team records the amount of money it earns.
8. The most appropriate means for displaying this information is a
A. bar graph
B. scatter plot
C. Venn diagram
D. stem-and-leaf plot

## Use the following information to answer question 9.

Two similar triangles are shown below.

Triangle A

Triangle B
9. What is the length of side $x$ of triangle B?
A. 16 cm
B. 20 cm
C. 24 cm
D. 28 cm

Use the following information to answer question 10.

In one day Mandy is paid $\$ 10 /$ hour for the first 8 hours she works and $\$ 15 /$ hour for every hour after that.
10. How much will Mandy be paid if she works 12 hours in one day?
A. $\$ 120$
B. $\$ 140$
C. $\$ 160$
D. $\$ 180$

Use the following information to answer question 11.
Samantha uses the broken ruler shown below to measure the length of her pencil.

Not drawn to scale
11. Approximately how long is Samantha's pencil?
A. 5 mm
B. 5 cm
C. 28 mm
D. 28 cm

Use the following table to answer question 12.

| Name of Mountain Peak | Angles of Mountain Slopes |
| :---: | :--- |
| Jones' Peak | Less than 20 degrees |
| Wells' Peak | Up to 30 degrees |
| Gallo's Peak | Between 30 and 40 degrees |

12. Based on the information in the table, which of the following statements is correct?
A. All the mountain slopes have acute angles.
B. All the mountain slopes have obtuse angles.
C. Gallo's Peak has an obtuse angle for its slopes, and Jones' Peak and Wells' Peak have acute angles.
D. Gallo's Peak has an acute angle for its slopes, and Jones' Peak and Wells' Peak have obtuse angles.

Use the following information to answer question 13.
A cabinetmaker is building a new kitchen countertop that has the dimensions shown below.

## Kitchen Countertop

13. What is the perimeter of the new countertop?
A. $\quad 6.3 \mathrm{~m}$
B. $\quad 9.5 \mathrm{~m}$
C. 12.6 m
D. 34.2 m

Use the following information to answer question 14.

A survey of 20 people was conducted to determine the type of vehicle that each person owns. The survey results are shown in the table below.

| Type of Vehicle | Number Owned |
| :---: | :--- |
| Car | HY HH |
| Truck | HY |
| SUV | III |
| None | II |

14. Which of the following pie charts best represents the data in the table?
A.

B.

C.

D.

Use the following information to answer numerical-response question 1.
Grade 9 students want to find out the favourite television shows of students in their school. To find and report this information, they need to complete four steps.

1 Make a graph of their findings
2 Survey the students
3 Complete a tally chart of responses
4 Create a survey questionnaire

## Numerical Response

1. Listed in order from the first step to the last step, the steps that the students must complete are $\qquad$ , $\qquad$ , $\qquad$ , and $\qquad$ .
(Record all four digits of your answer in the numerical-response section on the answer sheet.)

Use the following information to answer question 15.

The bar graph below shows the distances that several paper airplanes flew.

15. How many paper airplanes flew farther than 3.99 m ?
A. 7
B. 9
C. 10
D. 12

Use the following information to answer question 16.
Paul cycled 593.6 kilometres in 10 days.
16. If Paul cycled the same number of kilometres each day, then how many kilometres did Paul cycle each day?
A. $\quad 5.936 \mathrm{~km}$
B. $\quad 59.36 \mathrm{~km}$
C. 5936 km
D. $\quad 59360 \mathrm{~km}$

Use the following diagram to answer question 17.

17. Which of the following triangles represents a $90^{\circ}$ rotation of the triangle shown above?
A.

B.

C.

D.

Prenna measures the following dry ingredients for her cookie recipe:

18. The total amount of dry ingredients is
A. $\frac{5}{12}$ cup
B. $\frac{6}{12}$ cup
C. $1 \frac{1}{4}$ cups
D. $1 \frac{3}{4}$ cups
19. What is the greatest common factor of 12,18 , and 24 ?
A. 2
B. 3
C. 6
D. 8

Use the following information to answer question 20.

$$
2,3,5,8, \ldots, \ldots, 23,30
$$

20. What are the missing numbers in the pattern above?
A. $\quad 12$ and 17
B. $\quad 12$ and 18
C. 13 and 17
D. 13 and 18

Use the following equation to answer question 21.

$$
\$ 120.00-x=\$ 97.50
$$

21. Which of the following statements could describe the equation above?
A. Jane has an unknown amount of money, $x$, and spends $\$ 97.50$. She has $\$ 120.00$ left over.
B. Jane has an unknown amount of money, $x$, and spends $\$ 120.00$. She has $\$ 97.50$ left over.
C. Jane has $\$ 120.00$. She spends an unknown amount of money, $x$, and has $\$ 97.50$ left over.
D. Jane has $\$ 120.00$. She spends $\$ 97.50$ and has an unknown amount of money, $x$, left over.

Use the following information to answer numerical-response question 2.
A mathematics teacher needs to replace the batteries in 20 calculators. Each calculator uses 4 batteries.

## Numerical Response

2. If batteries are sold in packages of 16 , then what is the least number of battery packages that the mathematics teacher needs to buy?

Answer: $\qquad$ packages
(Record your answer in the numerical-response section on the answer sheet.)

## Knowledge and Employability Mathematics Test Blueprint and Item Descriptions

The following blueprint shows the reporting categories by which these questions were classified on the 2010 and 2011 Grade 9 Knowledge and Employability Mathematics Achievement Tests.

| General Outcomes | Reporting Category |  | Number (Percentage) of Questions |
| :---: | :---: | :---: | :---: |
|  | Knowledge | Skills |  |
| Number |  | $\begin{array}{rr} \hline 2 & 16 \\ 4 & 18 \\ 5 & 19 \\ 6 & \text { NR2 } \\ 10 & \\ \hline \end{array}$ |  |
| Patterns and Relations |  | $\begin{array}{r} 3 \\ 20 \\ 21 \\ \hline \end{array}$ |  |
| Shape and Space | $\begin{array}{r} 7 \\ 11 \\ 13 \end{array}$ | $\begin{gathered} 9 \\ 12 \\ 17 \end{gathered}$ |  |
| Statistics and Probability | 8 | $\begin{array}{rr} 1 & 15 \\ 14 & \text { NR1 } \end{array}$ |  |
| Number (Percentage) of Questions |  |  |  |

The table below provides information about each question: the keyed response, the difficulty of the item (the percentage of students who answered the question correctly), the reporting category, the strand, and the item description.

| Question | Key | Difficulty (\%) | Reporting Category | Strand | Item Description |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | B | 87.4\% | S | SP | Determine the likelihood of a random event occurring based on the occurrence of two previous events. |
| 2 | B | 64.7\% | S | N | Calculate the average of four given values. |
| 3 | D | 73.9\% | S | PR | Interpret information presented on a calendar to draw a conclusion related to a pattern. |
| 4 | D | 60.7\% | S | N | Solve a problem in an everyday context to determine an equivalent amount. |
| 5 | A | 83.0\% | S | N | Calculate total cost using information presented in a chart. |
| 6 | B | 61.3\% | S | N | Calculate a unit rate to determine fuel consumption. |
| 7 | D | 84.5\% | K | SS | Identify the most appropriate unit for measuring the mass of an item. |
| 8 | A | 77.6\% | K | SP | Determine the most appropriate means of displaying data. |
| 9 | C | 52.6\% | S | SS | Use given similar triangles to determine the unknown side of one of the triangles. |
| 10 | B | 49.4\% | S | N | Apply operations using whole numbers to solve an everyday problem. |
| 11 | B | 50.9\% | K | SS | Determine the length of a given object. |
| 12 | A | 43.0\% | S | SS | Interpret information to classify angles based on the angles of their slopes. |
| 13 | C | 77.7\% | K | SS | Calculate the perimeter of an irregular shape. |
| 14 | A | 73.3\% | S | SP | Identify the graph that best demonstrates the information presented in a table. |
| NR1 | 4231 | 44.7\% | S | SP | Determine the order of the given steps to complete a survey. |
| 15 | B | 60.5\% | S | SP | Draw a conclusion based on information in a bar graph. |
| 16 | B | 59.4\% | S | N | Apply arithmetic operations to solve a given problem in an everyday context. |

| Question | Key | Difficulty <br> $(\%)$ | Reporting <br> Category | Strand | Item Description |
| :---: | :---: | :---: | :---: | :---: | :--- |
| $\mathbf{1 7}$ | A | $58.6 \%$ | S | SS | Identify an example of a rotation. |
| $\mathbf{1 8}$ | D | $44.3 \%$ | S | N | Solve an addition problem using pictorial <br> representations of fractions. |
| $\mathbf{1 9}$ | C | $60.3 \%$ | S | N | Determine the greatest common factor of <br> given numbers. |
| $\mathbf{2 0}$ | A | $64.2 \%$ | S | PR | Identify missing numbers to complete <br> a given pattern. |
| $\mathbf{2 1}$ | C | $65.8 \%$ | S | PR | Explain a given expression using informal <br> algebraic methods. |
| $\mathbf{N R 2}$ | 5 | $50.3 \%$ | S | N | Solve an everyday problem using <br> arithmetic operations. |
