

How to fill out Green CWD labels

Alberta Chronic Wasting Disease (CWD) Surveillance Program deer head label submission information

Things to remember before filling out a green label

A green Chronic Wasting Disease (CWD) label is essential for us to track each deer head and send results back to you. Before filling out a green label, consider the following:

- **No green label = no test.** You must fill out and submit a green label with your deer head in order to receive CWD test results.
- Heads with or without a skull cap can be tested. Please remove the neck.
- Fill out **both sides** of the label (see below for details).
- Precise location data of the deer kill is **required**: GPS or SEC/TWP/RGE in addition to the WMU.
- Attach tag securely to the ear or jaw of the head. Remember to keep the bottom portion of the label.

Please fill out both sides of the label

Hunter/collector information (front of label)

Alberta
Fish and Wildlife
Alberta Chronic Wasting Disease Program

Name: _____
Address: _____
Town: _____ Postal Code: _____
Phone Number: _____
WIN #: _____, or
Treaty or Métis #: _____
Tag #: _____

COMPLETION OF ENTIRE LABEL IS ESSENTIAL
PLEASE SUBMIT HEAD AND ATTACH THIS LABEL
(Please complete other side)

Alberta
Fish and Wildlife
Alberta Chronic Wasting Disease Program

PLEASE LEAVE THIS PORTION OF
THE LABEL ATTACHED TO HEAD
USE PENCIL ONLY

Alberta
Fish and Wildlife
Alberta Chronic Wasting Disease Program

YOU KEEP THIS PORTION
For your reference, write your Tag# here:
Tag #: _____
See reverse for information on how to obtain results

ATTACH THIS PORTION TO THE HEAD.

It contains all the information we need to get results back to you.

Ensure tag is attached to head before sealing the bag so the tag and head do not get separated.

YOU KEEP THIS PORTION.

Test results will link the number to a particular deer. You may want to link each tag number to an individual animal at your residence.

Deer information (back of label)

The image shows the back of a green label for the Alberta Chronic Wasting Disease Program. It features three sections, each with a barcode and the number 'CWD-95000'. The top section is for data entry, including species, kill date, sex, and location information. The middle section is a warning to keep the sample frozen and to use pencil. The bottom section is for the hunter, providing a website and instructions to keep the label.

Species: Mule Deer White-tailed Deer Elk
Kill Date _mm_ / _dd_ / _yy_ Male Female
WMU: _____
Please complete at least one of:
1) Land Location: Sec. _____ Twp. _____ R. _____ W. _____
2) Lat/Long: _____°N _____°W or
3) UTM: _____ E _____ N
COMPLETION OF ENTIRE LABEL IS ESSENTIAL

PLEASE KEEP SAMPLE FROZEN
(Please complete other side)

PLEASE LEAVE THIS PORTION OF
THE LABEL ATTACHED TO HEAD
USE PENCIL ONLY

YOU KEEP THIS PORTION
For information about the results, please
visit: www.srd.alberta.ca/hunting/cwd
Please allow at least 6 weeks.
You will need this number

This information is critical for analysis of the Chronic Wasting Disease (CWD) surveillance data. Provide kill location as Wildlife Management Unit (WMU) plus legal land description, latitude/longitude (in decimal degrees please!), or UTM. **It is just as important to know where CWD does NOT occur.** Please do your best in determining the location and recording it.

Thank you for supporting the Alberta CWD Surveillance Program.
