This document contains released items from the 2010 and 2011 Grade 9 Knowledge and Employability Mathematics Achievement Tests.

A test blueprint and an answer key that includes the difficulty, reporting category, curricular content area, and item description for each test item are also included. These materials, along with the program of studies and subject bulletin, provide information that can be used to inform instructional practice.

For further information, contact

Ray Shapka, Senior Manager, Knowledge and Employability, at Ray.Shapka@gov.ab.ca; or

Nicole Lamarre, Director, Student Learning Assessments and Provincial Achievement Testing, at Nicole.Lamarre@gov.ab.ca at the Provincial Assessment Sector, or call 780-427-0010. To call toll-free from outside Edmonton, dial 780-310-0000.

2010 and 2011 Achievement Test Released Items

The items presented in this document are from the secured 2010 and 2011 Grade 9 Knowledge and Employability Mathematics Achievement Tests. These items are released by Alberta Education.
Use the following information to answer question 1.

Lisa has a bowl of gumdrops that are all the same size. The bowl contains the following different colours of gumdrops.

- 6 green
- 4 orange
- 5 red
- 5 yellow

1. Which colour of gumdrop is Lisa **most likely** to randomly pick from the bowl after first picking a red gumdrop and then an orange gumdrop?
   
   A. Red
   B. Green
   C. Yellow
   D. Orange

Use the following chart to answer question 2.

<table>
<thead>
<tr>
<th>David’s Work Week</th>
<th>Hours Worked</th>
</tr>
</thead>
<tbody>
<tr>
<td>Week 1</td>
<td>27 h</td>
</tr>
<tr>
<td>Week 2</td>
<td>32 h</td>
</tr>
<tr>
<td>Week 3</td>
<td>40 h</td>
</tr>
<tr>
<td>Week 4</td>
<td>41 h</td>
</tr>
<tr>
<td>Total hours</td>
<td>140 h</td>
</tr>
</tbody>
</table>

2. What is the average number of hours that David worked per week?
   
   A. 28 h
   B. 35 h
   C. 56 h
   D. 70 h
Emma’s swimming schedule follows a pattern, as shown in the calendar below.

<table>
<thead>
<tr>
<th></th>
<th>Sunday</th>

</tbody>
</table>

3. Which of the following statements best describes the pattern of Emma’s swimming schedule?

A. She swims every weekday.
B. She swims every second day.
C. She swims every second day one week and every third day the next week.
D. She swims Monday, Wednesday, and Friday one week, then Tuesday and Thursday the next week.
Use the following information to answer questions 4 and 5.

Kris buys popcorn before he watches a movie. The price list for the popcorn is shown below.

<table>
<thead>
<tr>
<th>Popcorn</th>
<th>Size</th>
<th>Price</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Small (200 g)</td>
<td>$3.50</td>
</tr>
<tr>
<td></td>
<td>Medium (400 g)</td>
<td>$4.25</td>
</tr>
<tr>
<td></td>
<td>Large (600 g)</td>
<td>$5.50</td>
</tr>
<tr>
<td></td>
<td>Extra butter</td>
<td>$0.75</td>
</tr>
</tbody>
</table>

*All prices include GST.*

4. How many small bags of popcorn equal 1 kg?
   A. 2
   B. 3
   C. 4
   D. 5

5. The total cost of 2 small bags of popcorn without extra butter and 1 large bag of popcorn with extra butter is
   A. $13.25
   B. $12.00
   C. $9.25
   D. $8.50

6. If a car can travel 550 km on 55 L of gasoline, then how far can it travel on 1 L of gasoline?
   A. 5 km
   B. 10 km
   C. 50 km
   D. 55 km
Use the following information to answer question 7.

A student wants to determine the mass of a bag of oranges.

7. Which of the following units would be appropriate for measuring the mass of the oranges?
   
   A. Feet  
   B. Yards  
   C. Litres  
   D. Kilograms

Use the following information to answer question 8.

A soccer league is raising funds for new equipment. Each team records the amount of money it earns.

8. The most appropriate means for displaying this information is a
   
   A. bar graph  
   B. scatter plot  
   C. Venn diagram  
   D. stem-and-leaf plot
Use the following information to answer question 9.

Two similar triangles are shown below.

9. What is the length of side $x$ of triangle B?

A. 16 cm  
B. 20 cm  
C. 24 cm  
D. 28 cm

Use the following information to answer question 10.

In one day Mandy is paid $10/hour for the first 8 hours she works and $15/hour for every hour after that.

10. How much will Mandy be paid if she works 12 hours in one day?

A. $120  
B. $140  
C. $160  
D. $180
11. Approximately how long is Samantha’s pencil?
   A. 5 mm
   B. 5 cm
   C. 28 mm
   D. 28 cm

12. Based on the information in the table, which of the following statements is correct?
   A. All the mountain slopes have acute angles.
   B. All the mountain slopes have obtuse angles.
   C. Gallo’s Peak has an obtuse angle for its slopes, and Jones’ Peak and Wells’ Peak have acute angles.
   D. Gallo’s Peak has an acute angle for its slopes, and Jones’ Peak and Wells’ Peak have obtuse angles.
A cabinetmaker is building a new kitchen countertop that has the dimensions shown below.

13. What is the perimeter of the new countertop?

A. 6.3 m  
B. 9.5 m  
C. 12.6 m  
D. 34.2 m
A survey of 20 people was conducted to determine the type of vehicle that each person owns. The survey results are shown in the table below.

<table>
<thead>
<tr>
<th>Type of Vehicle</th>
<th>Number Owned</th>
</tr>
</thead>
<tbody>
<tr>
<td>Car</td>
<td>⬠ ⬠ ⬠</td>
</tr>
<tr>
<td>Truck</td>
<td>⬠ ⬠ ⬠</td>
</tr>
<tr>
<td>SUV</td>
<td>⬠ ⬠</td>
</tr>
<tr>
<td>None</td>
<td>⬠ ⬠</td>
</tr>
</tbody>
</table>

14. Which of the following pie charts best represents the data in the table?

A. 

B. 

C. 

D.
Use the following information to answer numerical-response question 1.

Grade 9 students want to find out the favourite television shows of students in their school. To find and report this information, they need to complete four steps.

1. Make a graph of their findings
2. Survey the students
3. Complete a tally chart of responses
4. Create a survey questionnaire

Numerical Response

1. Listed in order from the first step to the last step, the steps that the students must complete are _____, _____, _____, and _____.

(Record all four digits of your answer in the numerical-response section on the answer sheet.)

Use the following information to answer question 15.

The bar graph below shows the distances that several paper airplanes flew.

15. How many paper airplanes flew farther than 3.99 m?

A. 7  
B. 9  
C. 10  
D. 12
Use the following information to answer question 16.

Paul cycled 593.6 kilometres in 10 days.

16. If Paul cycled the same number of kilometres each day, then how many kilometres did Paul cycle each day?

A. 5.936 km
B. 59.36 km
C. 5 936 km
D. 59 360 km

Use the following diagram to answer question 17.

17. Which of the following triangles represents a 90° rotation of the triangle shown above?

A.  
B.  
C.  
D.  
Use the following information to answer question 18.

Prenna measures the following dry ingredients for her cookie recipe:

- \( \frac{1}{3} \text{ cup brown sugar} \)
- \( \frac{3}{4} \text{ cup flour} \)
- \( \frac{2}{3} \text{ cup oatmeal} \)

18. The total amount of dry ingredients is

A. \( \frac{5}{12} \text{ cup} \)

B. \( \frac{6}{12} \text{ cup} \)

C. \( 1 \frac{1}{4} \text{ cups} \)

D. \( 1 \frac{3}{4} \text{ cups} \)

19. What is the greatest common factor of 12, 18, and 24?

A. 2

B. 3

C. 6

D. 8
Use the following information to answer question 20.

\[
2, 3, 5, 8, __, __, 23, 30
\]

20. What are the missing numbers in the pattern above?

A. 12 and 17
B. 12 and 18
C. 13 and 17
D. 13 and 18

Use the following equation to answer question 21.

\[
$120.00 - x = $97.50
\]

21. Which of the following statements could describe the equation above?

A. Jane has an unknown amount of money, \( x \), and spends $97.50. She has $120.00 left over.
B. Jane has an unknown amount of money, \( x \), and spends $120.00. She has $97.50 left over.
C. Jane has $120.00. She spends an unknown amount of money, \( x \), and has $97.50 left over.
D. Jane has $120.00. She spends $97.50 and has an unknown amount of money, \( x \), left over.
A mathematics teacher needs to replace the batteries in 20 calculators. Each calculator uses 4 batteries.

**Numerical Response**

2. If batteries are sold in packages of 16, then what is the least number of battery packages that the mathematics teacher needs to buy?

   **Answer:** _________ packages

   (Record your answer in the numerical-response section on the answer sheet.)
The following blueprint shows the reporting categories by which these questions were classified on the 2010 and 2011 Grade 9 Knowledge and Employability Mathematics Achievement Tests.

<table>
<thead>
<tr>
<th>General Outcomes</th>
