This document contains assessment highlights from the 2018 Grade 6 Mathematics Achievement Test.

*Assessment Highlights* provides information about the overall test, the test blueprint, and student performance on the achievement test that was administered in 2018. Also provided is information on student performance at the acceptable standard and the standard of excellence on selected items from the 2018 Grade 6 Mathematics Achievement Test. This information is intended for teachers and is best used in conjunction with multi-year and detailed school reports that are available in schools via the extranet. *Assessment Highlights* reports for all achievement test subjects and grades are posted on the Alberta Education website every year in the fall.

The examination statistics that are included in this document represent both French and English writers. If you would like to obtain English-only statistics or French-only statistics that apply to your school, please refer to your detailed reports, which are available on the extranet.

All released achievement tests, including test blueprints, answer keys with the item difficulty, reporting category, test section, and item description for each test item, are posted on the Alberta Education website (see [Achievement Documents](#)).

These materials, along with the program of studies and subject bulletins, provide information that can be used to inform instructional practice.

For further information, contact:
Kelly Rota, Exam Manager, Grades 6 and 9 Mathematics, at Kelly.Rota@gov.ab.ca;
Heidi McInnes, Examiner, Grades 6 and 9 Mathematics, at Heidi.McInnes@gov.ab.ca; or
Nicole Lamarre, Director, Student Learning Assessments and Provincial Achievement Testing, at Nicole.Lamarre@gov.ab.ca at the Provincial Assessment Sector, or call 780-427-0010. To call toll-free from outside Edmonton, dial 310-0000.

The 2018 Grade 6 Mathematics Achievement Test

This report provides teachers, school administrators, and the public with an overview of the performance of those students who wrote the 2018 Grade 6 Mathematics Achievement Test. It complements the detailed school and jurisdiction reports.

How Many Students Wrote the Test?
A total of 46,883 students wrote the 2018 Grade 6 Mathematics Achievement Test. The English form of the test was written by 43,089 students, and the French form of the test was written by 3,794 students.

What Was the Test Like?
The 2018 Grade 6 Mathematics Achievement Test consisted of two parts: **Part A** and **Part B**.

Part A consisted of 15 questions and represented 10% of the final overall test score. There were three addition questions, four subtraction questions, four multiplication questions, and four division questions. The format of the questions was numerical-response, which required students to generate a response (in symbolic form) to a particular problem, rather than selecting a response from a list of four options. Each response consisted of a maximum of four digits or, if a decimal point occurred in the answer, three digits.

Part B consisted of 40 questions and represented 90% of the final overall test score. The format of the questions was multiple choice, which provided students with four response options, of which only one was correct. The questions on the test required students to apply their understanding of one or more mathematical concepts from within and/or across the four strands: Number, Patterns and Relations, Shape and Space, and Statistics and Probability. The results presented in this report are based on the scores of all students who wrote the test. Detailed provincial assessment results are provided in school and jurisdiction reports.

How Well Did Students Do?
The percentages of students meeting the acceptable standard and the standard of excellence in 2018 are shown in the graph below. In 2018, 80.1% of students who wrote the Grade 6 Mathematics Achievement Test achieved the acceptable standard, and 15.3% of students who wrote achieved the standard of excellence.
# 2018 Test Blueprint and Student Achievement

The blueprint below shows how the questions on the test were classified and includes the average raw score in each category for all Grade 6 students who wrote this test. There was a very strong positive correlation between student performance on Part A and performance on Part B. This indicates a strong relation between routine algebraic operations and problem solving. Generally speaking, students who performed well on Part A also performed well on Part B, and vice versa.

## Part A Test Blueprint

<table>
<thead>
<tr>
<th>Program of Study Strands</th>

*Includes those students who achieved the acceptable standard but not the standard of excellence

1. What is 5.75 + 0.49?

   **Answer:**

   Common correct response:

   $\begin{align*}
   \frac{1}{5.75} + \frac{1}{0.49} &= \frac{6.24}{6.24} \\
   &= 1
   \end{align*}$

   Common incorrect responses:

   $\begin{align*}
   \frac{1}{5.75} + \frac{1}{0.49} &= \frac{5.26}{5.26} \\
   &= 1
   \end{align*}$

</thead>
<tbody>
<tr>
<td>Students Achieving Standard of Excellence (n = 16 642)</td>
<td>88.6</td>
<td>349</td>
<td>1901 (144), 243 (128), 1620 (82)</td>
</tr>
<tr>
<td>Students Achieving Acceptable Standard* (n = 33 842)</td>
<td>56.6</td>
<td>1152</td>
<td>141 (584), 243 (470), 1901 (257)</td>
</tr>
<tr>
<td>Students Below Acceptable Standard (n = 13 041)</td>
<td>14.6</td>
<td>2067</td>
<td>141 (1403), 241 (443), 1221 (409)</td>
</tr>
</tbody>
</table>

*Includes those students who achieved the acceptable standard but not the standard of excellence

2. What is \(27 \times 63\)?

**Answer:** _________

Common correct response:

\[
\begin{array}{c}
  \underline{27} \\
  \times \underline{63} \\
  \underline{162} \\
  \underline{162} \\
  \underline{1701}
\end{array}
\]
Common incorrect responses:
\[
\frac{48}{27} \div 243 = \frac{1}{81} \div 162 = \frac{1}{243}
\]

\[
\frac{168}{27} + \frac{16}{27} + \frac{4}{27} + \frac{6}{27} = \frac{249}{243}
\]

\[
\frac{2}{27} \times 6 = \frac{12}{27} = \frac{2}{3} = \frac{8}{18} = \frac{1}{9}
\]
### Item Description

5. What is $30.3 \times 3$?

**Answer:**

Common correct response:

\[
\begin{array}{c}
30.3 \\
\times 3 \\
\hline
90.9
\end{array}
\]

Common incorrect responses:

\[
\begin{array}{c}
30.3 \\
\times 3.0 \\

A factor tree for the number 36 is shown below.

```
     36
    /  \  \
   2   18
  /  \  /  \
 2   9 3  3
```

7. Which of the following statements is correct?

A. The product of two prime numbers is always prime.
B. The only prime factor of the number 36 is 3.
C. The numbers 2 and 3 are prime.
D. The number 9 is prime.
12. Which of the following ratios represents the ratio of the area of the shaded triangle to the area of the entire design shown above?

A. 1:12  
B. 1:14  
C. 1:16  
D. 1:18
## Item #17

A campground has 100 campsites. On the first weekend in May, 25% of the campsites are occupied.

20. What fraction represents the number of campsites in the campground that are occupied?
   A. $\frac{1}{2}$
   B. $\frac{1}{3}$
   C. $\frac{1}{4}$
   D. $\frac{1}{5}$
Monique’s parents rent a local skating rink for Monique’s birthday party. The rink has a rental fee of $50 for each hour and $5 for each skater ($s$).

22. Which expression represents the total cost of the rental if Monique’s parents rent the rink for 2 hours?

A. $2 \times 50 + 5s$

B. $5 \times 50 + 2s$

C. $2 \times 5 + 100s$

D. $s \times 50 + 5 + 2$
Two bags of marbles are shown below. Each bag contains red marbles and white marbles.

24. How many red marbles need to be added to Bag 2 so that the probability of drawing a red marble is the same for each bag?

A. 3  
B. 4  
C. 6  
D. 9

**Use the following information to answer question 29.**

Gabby created a 2-D design in the first quadrant of the Cartesian plane by plotting the points (0, 9), (8, 9), (5, 6), (8, 3), and (0, 3) and connecting the points in the order given.

29. Which of the following 2-D designs matches the shape that Gabby created?
### Item 30

What is the minimum volume that the delivery bag shown above needs to be if 2 pizza boxes are placed in it?

A. 7 200 cm$^3$
B. 14 400 cm$^3$
C. 21 600 cm$^3$
D. 64 800 cm$^3$
Dana joins an art club that meets once a week for 6 weeks. There is a one-time cost of $25.00 to join the club. At the beginning of each class, there is a $3 fee paid to cover the cost of materials. Dana attends 4 out of the 6 classes.

34. Which equation represents the total amount \( n \) that Dana pays to join the art club and attend classes?

A. \( 25 + (4 \times 6) = n \)
B. \( 25 + (4 \times 3) = n \)
C. \( 25 \times 4 + 3 = n \)
D. \( 25 \times 4 = n \)

37. What is the measure of angle $y$ in the diagram shown above?

- A. 96°
- B. 84°
- C. 54°
- D. 42°
A physical education class of 24 students prepares to play a game. Students are to be divided into teams of equal numbers.

38. Based on the information above, students can be divided into teams of equal groups of
   A. 3, 4, 6, or 8 players
   B. 3, 4, 8, or 9 players
   C. 4, 6, 7, or 8 players
   D. 4, 6, 8, or 9 players
39. Which two thermometers shown above have a temperature reading that is between −19 °C and −26 °C?

A. Thermometers 1 and 2
B. Thermometers 2 and 3
C. Thermometers 3 and 4
D. Thermometers 1 and 4
**Provincial Achievement Testing Program**  
**Support Documents**

The Alberta Education website contains several documents that provide valuable information about various aspects of the Provincial Achievement Test program. To access these documents, go to the Alberta Education website. Click on one of the specific links to access the following documents.

**Achievement Testing Program General Information Bulletin**
The *General Information Bulletin* is a compilation of several documents produced by Alberta Education and is intended to provide superintendents, principals, and teachers with easy access to information about all aspects of the Provincial Achievement Test program. Sections in the bulletin contain information pertaining to schedules and significant dates; security and test rules; test administration directives, guidelines, and procedures; calculator and computer policies; test accommodations; test marking and results; field testing; resources and web documents; forms and samples; and Provincial Assessment Sector contacts.

**Subject Bulletins**
At the beginning of each school year, subject bulletins are posted on the Alberta Education website for all Provincial Achievement Test subjects for grades 6 and 9. Each bulletin provides descriptions of assessment standards, test design and blueprinting, and scoring guides (where applicable), as well as suggestions for preparing students to write the tests and information about how teachers can participate in test development activities.

**Examples of the Standards for Students’ Writing**
For Provincial Achievement Tests in grades 6 and 9 English Language Arts and Français/French Language Arts, writing samples are designed for teachers and students to enhance students’ writing and to assess this writing relative to the standards inherent in the scoring guides. The exemplars documents contain sample responses with scoring rationales that relate student work to the scoring categories and scoring criteria.

**Previous Achievement Tests and Answer Keys**
All January Provincial Achievement Tests (parts A and B) for Grade 9 semestered students are secured and must be returned to Alberta Education. All May/June Provincial Achievement Tests are secured except Part A of grades 6 and 9 English Language Arts and Français/French Language Arts. Unused or extra copies of only these Part A tests may be kept at the school after administration. Teachers may also use the released items and/or tests that are posted on the Alberta Education website.

**Parent Guides**
Each school year, versions of the *Alberta Provincial Achievement Testing Parent Guide* for grades 6 and 9 are posted on the Alberta Education website. Each guide answers frequently asked questions about the Provincial Achievement Test program and provides descriptions of and sample questions for each Provincial Achievement Test subject.

**Involvement of Teachers**
Teachers of grades 6 and 9 are encouraged to take part in activities related to the Provincial Achievement Test program. These activities include item development, test validation, field testing, and marking. In addition, arrangements can be made through the Alberta Regional Professional Development Consortia for teacher in-service workshops on topics such as interpreting Provincial Achievement Test results to improve student learning.
