

Adjustments to Loadforms

- Remove Reference Material section on the Project and Reference Info tab: do not require if not submitted. If submitted, then the material should be provided electronically.
- Active Feature vs Nest Feature Column
- User Surveyor ID column to allow users to enter their names.
- Remove several old Abundance Codes.
- Remove old Feature Codes. (BREEDING).
- Remove errant survey date validations.
- Remove evidence option of SIGN. (Sign should be entered under the Features section.)
- Updated species list. Several new species were added (e.g. Muskox) and some name changes (e.g. Common Snipe was updated to Wilson's Snipe.)
- Remove species code worksheet.
