

Improve Patient Care through Collaborative Practice and Education in Health Care

What does it MEAN?

Finding and acting upon opportunities to work and learn more collaboratively in the interest of patient care. Working “hand-in-hand” rather than “handing-off.”

Who does it INVOLVE?

YOU, those you work and learn with, and those you provide care to every day.

Why does it MATTER?

Because it will lead to better patient outcomes – the very reason we all do what we’ve been educated to do.

How does it WORK?

High-performing teams and collaborative relationships connect everyone to better patient outcomes.

What do I do NEXT?

Read the Framework and Workplan for Change.
Start talking about it in your organization.
