Classification: Protected A

Knowledge:

Position must have indepth knowledge of press techniques and processes as well as highly specialized printing skills in order to operate the press equipment. The D- rating reflects that the preparation needed is approaching the knowledge required for a trades position (which is typically at a D level due to specialized skills). The four-colour press requires more than one operator to produce a job. Therefore, the Senior Operator must be aware of how their work relates to the Junior Operators in order to provide them with information and technical direction on what tasks to perform during printing. Communication with the Junior Operators is for the purpose of exchanging information. The benchmark does not have formal supervisory responsibilities.

Creativity/Problem Solving:

Works independently within established procedures to operate complex printing presses. The position must exercise judgement to organize day-to-day work and make adjustments to the press during the course of a printing run.

Responsibility:

Service delivery focus providing printing services.

Subsidiary 1 Benchmark Job Description - 015OS02

Identification Section

Working Title:	Senior Press Operator
Department:	Education
Division, Branch/Unit:	Corporate Services Division, Program Resources, Operations and Services
Reports To:	Graphic Services Supervisor Production Manager
Levels to D.M.:	6

Purpose

(Brief summary of the job, covering the main responsibilities, the framework within which the job has to operate and the main contribution to the organization.)

The Senior Press Operator is responsible for the quality production of printed materials on the four-colour perfecter and a variety of other presses. Position supervises the second and assisting pressmen, and assists with training other staff. Responsibilities include equipment set-up, adjustment, operation and maintenance, quality control and record keeping.

Responsibilities and Activities

(Purpose of the job can be broken down in different responsibilities and end results. Each end result shows what the job is accountable for, within what framework, and what the added value is.)

1. Press equipment set-up, operation and maintenance.

- Set up two/four-colour perfecter press including feeder, delivery, cylinders, roller train, registration, ink and water control, packing, ink trapping and colour match.
- Operate two/four-colour perfecter press including plate handling, ink mixing and doctoring, fountain concentration pH control and testing, paper types and properties (grain, handling, sizing).

- Maintain production quality and quantity standards. Maintain production quality throughout the press run through: monitoring/adjusting ink density, maintaining ink/fountain solution balance, fine tune/adjust paper path from initial set up and ongoing press maintenance of systems, roller settings and coverings. Quantity standards are to be met based on the type of document, run length and press used.
- Utilize ancillary equipment including densitometer, packing gauge, micrometer and ink scale.
- Trouble-shoot and adjust equipment.
- Consult with service technicians.

2. Supervise and train press operators.

- Supervise the second and assisting pressmen including assignment of work and determining procedures. All operators referred to are Duplicating Equipment Operators, at various levels, working on press. Senior Press Operators provide ongoing guidance to junior and intermediate level operators to facilitate ongoing skills development. Entry level press operators typically begin in an "assisting" role, loading and unloading, etc. to provide support to intermediate and senior level operators; then moving on up through the various aspects and complexities of offset press operation, until they reach a point where they've mastered sufficient breadth of understanding and skill to allow them to take on (closely supervised) independent press operations as junior press operators. The supervision and training referred to here is of a "lead hand" nature, rather than a full and direct supervisory relationship.
- Train and update skill levels of second pressmen.
- Assist with the training of other apprentices.

3. Record keeping and other miscellaneous duties.

- Maintain accurate production and service logs.
- Set-up and operate two/four-colour perfecter presses.
- Other related duties.

Scope

(Illustrates what internal or external areas the job impacts, and the diversity, complexity, and creativity of the job.)

Position is a working supervisor (lead hand) and operates four-colour and two-colour presses.

Contacts

(Main contacts of this position and the purpose of those contacts.)

Most communication is for the purpose of directing and training subordinates and other staff. Will discuss client requirements. (See context provided under #2, Responsibilities and Activities.)

Knowledge, Skills and Abilities

(Most important knowledge factors, skills and abilities including knowledge about practical procedures, specialized techniques, etc.; analytical and conceptual skills and abilities; and skills needed for direct interaction with others not only diplomas and degrees. Specific training if it is an occupational certification/registration required for the job.)

Position requires an indepth knowledge of press techniques and processes, and highly developed skills in the operation and utilization of press equipment and materials. This is a lead hand position, without formal supervision duties. Incumbents in these positions are expected to share their specialist knowledge with less experienced (junior) press operators, to help in the progressive development of skills/techniques that support efficient achievement of high quality press operations and output.

Organization

(Working titles of positions reporting directly to this position.)

Typically requires a Grade XII diploma and considerable related experience including some supervisory experience.

Subsidiary 1 Benchmark Job Description - 015OS01

Identification Section

Working Title:	Stockkeeper
Department:	Agriculture and Forestry
Division, Branch/Unit:	Provincial Warehouse, Wildfire Services Branch, Forest Protection Division
Reports To:	Provincial Warehouse Manager (Manager 3)
Levels to D.M.:	4

Purpose

(Brief summary of the job, covering the main responsibilities, the framework within which the job has to operate and the main contribution to the organization.)

Reporting to the Provincial Warehouse Manager, this position is responsible for the warehouse floor operations of the provincial warehouse including receiving, storage, packing of kits, distribution and shipping of fire equipment, uniform components and other items for the Department.

Responsibilities and Activities

(Purpose of the job can be broken down in different responsibilities and end results. Each end result shows what the job is accountable for, within what framework, and what the added value is.)

- 1. Supervision of three permanent Stockkeepers and three entry level seasonal Stockkeepers in all facets of the warehouse operations. This includes:**
 - Receiving goods into the warehouse, reconciling with purchase records and advising the purchasing section of any quantity discrepancies or quality problems.
 - Storing of goods including determining storage location and space requirements, proper packaging and safe storage.
 - Packing of kits - using stock items to put together kits in accordance with the provincial kit lists and equipment standards.

- Distribution of goods coming into the warehouse for other sections and for other branches of the department.
- Shipping of goods in accordance with orders received.
- Ensuring safe work practices and a safe work environment in the shipping/receiving, warehouse, cold storage and yard areas.
- Ensuring section staff follow department policy and procedures.
- Ensuring equipment, tools, racking and shelving is maintained in a safe and serviceable condition.
- Maintaining a neat and tidy warehouse and yard facility.

2. Managing inventory through:

- Physical counts - cyclic counts for the main fire equipment items and an annual complete physical count.
- Reconciling inventory through consumable adjustments as required and preparing write-off documentation for the Provincial Warehouse Supervisor's approval.
- Transferring obsolete and unusable items to ACSC Surplus Sales for disposal.
- Maintaining the inventory movements on the IMIS system accurately and in a timely manner.
- Advising the Purchasing Section of impending stock shortages.
- Provides inventory reports to "owners" of stored inventory, e.g. Parks and Enforcement Field Services uniform stock levels.

3. Participates in the development of inventory management systems, procedures and processes for the Department at the provincial level.

- Participates on the Inventory Management Working Group.
- Provides input into procedure and process documentation.
- Provides advice and interpretation of procedure and process to the field warehouse staff.

4. Coordinates movement of items from WSC:

- Coordinates movement of equipment and consumable items with the Supervisors in the Administration, Mechanical and Refurbishing sections of WSC.
- Provides receiving and shipping services for other areas, e.g. Telecommunications, Weather, RAP, PFFC staff and staff from other divisions and field offices.

5. Coordinates Mutual Aid Equipment sharing:

- Liaises with the Provincial Forest Fire Centre regarding equipment shipments to and from other provinces and agencies.

- Coordinates the movement of imported mutual aid equipment in the province and its return to the Provincial Warehouse.
- Coordinates with loaning agencies regarding the return shipments and reconciliation of shortages.
- Coordinates with borrowing agencies regarding the receipt and return of shipments and reconciliation of shortages.

6. Participates in working groups involved with the fire equipment issues.

Scope

(Illustrates what internal or external areas the job impacts, and the diversity, complexity, and creativity of the job.)

Incumbent makes decisions on daily operations independently based on established standards and guidelines with direction given in exceptional situations. Work is reviewed formally on a daily basis by the manager where evaluation is based on the work's accuracy, timelines and feedback from clients and supervisors.

Development and enhancement of the inventory management system requires forward and creative thinking to meet the future needs of the Department.

Contacts

(Main contacts of this position and the purpose of those contacts.)

- Other section staff in the provincial warehouse to address equipment and supply purchasing, repair and refurbishing issues.
- Area warehouse staff to coordinate the movement of equipment and supply items between warehouses and area uses.
- Provincial Forest Fire Centre staff to coordinate movement of equipment and supply items interprovincially.
- Staff from other divisions at all levels in regards to the supply and distribution of uniform components and other items.
- Other Department staff regarding supply of uniform components (e.g. Community Development - Parks Conservation Officers) and other warehousing issues (e.g. ACSC Surplus Sales staff).

Knowledge, Skills and Abilities

(Most important knowledge factors, skills and abilities including knowledge about practical procedures, specialized techniques, etc.; analytical and conceptual skills and abilities; and skills needed for direct interaction with others not only diplomas and degrees. Specific training if it is an occupational certification/registration required for the job.)

- Extensive experience and knowledge in warehousing and materials management including computerized inventory management systems.
- Good verbal and written communication skills.
- Working knowledge of forest protection equipment requirements and usage.
- Ability and skills in the safe operation of materials handling equipment, e.g. fork lifts, pallet stackers, wrappers, strappers, etc.
- Basic knowledge of government and departmental financial policies and procedures.
- The following directives and guidelines are used in the day-to-day operation of the warehouse: Department Financial Policies and Procedures; Inventory Manual; Fire Equipment Standards and Maintenance Manual; FPD Policy and SOP Manual; Master and Divisional Union Agreements; OH&S Legislation, Program, Plan and Directives; ACSC Surplus and Disposal Guidelines; Transportation of Dangerous Goods Regulations; WHMIS and Material Safety Data Sheet.
- Requires a Grade XII education.
- Warehouse Occupation Intermediate or Technician Certificate is beneficial.
- First Aid, Transportation of Dangerous Goods, WHMIS and Defensive Driving certificates are beneficial.

Organization

(Working titles of positions reporting directly to this position.)

Position supervises three permanent Stockkeepers and three entry level Stockkeepers. As well the position may supervise two to six temporary Stockkeepers, Maintenance Service Workers and/or Labourers as workloads require.

The logo for the Government of Alberta, featuring the word "Alberta" in a stylized, cursive script font, followed by a small square icon.

The position conducts their work independently and is responsible for the production of pre-press digital files, photographic film, and offset printing plates using a variety of equipment that includes computers and software.

1. Maintains quality and quantity standards as set from production expectations to meet or improve on the estimated time and materials usage on each job received. This information is received from the Graphics Services Supervisor.
2. Position will set up and operate a variety of pre-press software and equipment and maintain the necessary equipment. This equipment includes:
 - Digital imposition, separation and trapping commercial pre-press software (Agfa, Pilot, Print Drive, PDF Rip).
 - MacIntosh and PC publishing applications (Quark Express, Adobe Photoshop, Illustrator, InDesign, Pagemaker, Acrobat).
 - 5000 DPI Agfa scanner using Agfa colourwise software.
 - Agfa Avantara 30 image setter.
 - Film processor (chemicals include developer and fix).
 - Plate processor (chemicals include Developer and industry standard gum).
 - Plate burner/contact frame.
 - Light table.
3. Performs daily, weekly and long term preventative maintenance of the equipment that include; Digital file maintenance, archival of final document pre-press files using internal process with direction from Agfa.
4. Create new templates for specific document finishing.
5. Maintains the scanner, image setter, and film and plate processors from training received from manufacturers and supplemented by equipment manuals. Adjusts equipment and performs minor repairs.
6. Record keeping (electronic for archived) accurate entry of time and materials used for job costing and future forecasting. Maintain daily, weekly and monthly production records.
7. Responsible for requisitioning materials and supplies for pre-press unit. Including film, plates, chemistry and miscellaneous items. Graphics Services Supervisor approves requisitions.
8. Cross train any staff for proactive position cover off.

Scope

(Illustrates what internal or external areas the job impacts, and the diversity, complexity, and creativity of the job.)

The position requires an understanding of the entire printing process (pre-press, press and post-press) in order to set up the job to accommodate the requirements on the docket (i.e. how the pre-press job is prepared will have implications on whether the printing or binding specifications in the docket can be achieved.)

Impacts include meeting short term timelines and unscheduled/rush orders.

Position is required to be able to handle changes in technological advancements as they become available in the unit.

Operator has to be creative in modifying a previous standard to accommodate and integrate revisions to a legacy document (a document created with previous processes that requires an update to current processes).

Employee receives direction from immediate supervisor when the ability to schedule their workload is impacted by short time lines from receiving increased unanticipated work.

Monitors the workflow throughout the unit to ensure efficiency in productivity.

Contacts

(Main contacts of this position and the purpose of those contacts.)

Works in a skilled production team environment. External contact includes original artists to exchange information.

Knowledge, Skills and Abilities

(Most important knowledge factors, skills and abilities including knowledge about practical procedures, specialized techniques, etc.; analytical and conceptual skills and abilities; and skills needed for direct interaction with others not only diplomas and degrees. Specific training if it is an occupational certification/registration required for the job.)

- Position requires an in-depth knowledge of pre-press process, commercial pre-press software and publishing applications, intermediate computer knowledge, lithographic techniques.
- Producing photographic film for image assembly, impositioning, stripping, off-press proofing, plating, colour separations, and image setting.

- Considerable skill level in the operation and utilization of prepress equipment; MAC and PC publishing applications/programs, Image setter (Agfa Avantra 30), film and plate processors, plate burner/contact frame, light table and a variety of materials and chemicals.
- Position is required to follow branch procedures, technical specifications and guidelines (equipment and processing manuals) for all equipment and materials used in the position (chemicals, equipment). Have considerable experience in graphic arts technical skills.
- Ability to be innovative and creative to produce the required product for each job.
- Good interpersonal skills and the ability to handle high volumes of work within short time frames.
- Mechanical aptitude in the following equipment; Image Setter, processors, plate burner/contact frames, light table, computer.
- Typically requires a Grade XII diploma and considerable related experience.

Organization

(Working titles of positions reporting directly to this position.)

While this position has no formal supervisory responsibilities, it cross trains other staff as required.

Subsidiary 1 Benchmark Job Description - 014OS01

Identification Section

Working Title:	Print Centre Supervisor / Docutech Operator
Department:	Service Alberta
Division, Branch/Unit:	ACSC, Administration Services / Print Services
Reports To:	Supervisor, Mail and Print Services
Levels to D.M.:	5

Purpose

(Brief summary of the job, covering the main responsibilities, the framework within which the job has to operate and the main contribution to the organization.)

The Supervisor/Docutech Operator oversees and provides cost effective and high quality advanced electronic publishing, duplicating and bindery services. Position receives jobs either in hardcopy or electronically, compiles the data and recommends the most efficient and cost effective method of production. Subsequently, materials are scanned into a Docutech high production copier or a colour copier, images are manipulated if required and final copies are produced.

Position will also bind the copies before shipping the completed order.

Responsibilities and Activities

(Purpose of the job can be broken down in different responsibilities and end results. Each end result shows what the job is accountable for, within what framework, and what the added value is.)

1. Supervisory and administrative responsibilities.

- Supervises several full-time operators.
- Supervises the day-to-day operations of the Duplicating Centre.
- Ensuring deadlines are met by coordinating with other centres work overloads.

- Adheres to the procedures and policies for products that require security requirements.
- Create and update customer-billing accounts, print monthly reports, and provide input in the forecasting of the centres budget.
- Coordinate ordering, receipt and storage of paper and production supplies.
- Attends demo's making sure that the print centre is up-to-date with the current software and equipment.
- Has input into the purchase of new equipment related to the operations of the duplicating centre.

2. Operates reproduction equipment.

- Operates Docutech Publishers and a colour copier.
- Consult with clients to determine needs and the most appropriate method of production of large-scale production projects.
Receive electronic job tickets through the Docutech and colour copier network servers.
- Perform set-up, formatting, editing and image enhancement.
- Manage print queues, schedule jobs, and direct job flow through the job manager work station.
- Monitor jobs as they are running.
- Schedule, operate and maintain the equipment.

3. Operate bindery equipment.

- Provide cutting, stapling, collating, jogging, drilling, paper banding and padding services.
- Provide delivery runs as required.
- Shrink wrapping.

Scope

(Illustrates what internal or external areas the job impacts, and the diversity, complexity, and creativity of the job.)

This position is responsible for ensuring the smooth operations of a print and duplicating centre. This service is provided to all GOA clients. The position operates complex reproduction equipment. The cut and paste functions of the Docutechs are complex and good visual reasoning as well as technical skills are required to manipulate images into a professional end product.

Contacts

(Main contacts of this position and the purpose of those contacts.)

Contacts are primarily for the purpose of discussing client requirements and to provide recommendations on how best to provide to those needs. Provides direction to the duplicating centre staff.

Knowledge, Skills and Abilities

(Most important knowledge factors, skills and abilities including knowledge about practical procedures, specialized techniques, etc.; analytical and conceptual skills and abilities; and skills needed for direct interaction with others not only diplomas and degrees. Specific training if it is an occupational certification/registration required for the job.)

- Position requires some supervisory experience. Excellent technical knowledge of the Docutech Publisher as well as colour copier functions in order to manipulate and customize data and images. Must have a working knowledge of network servers, print drivers and queue management. Requires the ability to use a variety of bindery equipment.
- Typically requires a high school diploma and Docutech certification as provided by the manufacturer. Minimum one year supervisory experience.

Organization

(Working titles of positions reporting directly to this position.)

This position supervises two full-time operators and supervises temporary employees as required. Assigns and evaluates work, prepares and conduct performance reports and participates in the hiring and selecting of staff.

Identification Section

Working Title:	Computer Production Controller
Department:	Service Alberta
Division, Branch/Unit:	ACSC, Data Centres, Data Centre Admin.
Reports To:	Team Leader, Systems Analyst Level 2
Levels to D.M.:	4

Purpose

(Brief summary of the job, covering the main responsibilities, the framework within which the job has to operate and the main contribution to the organization.)

The Production Controller position performs administrative and technical tasks. Major responsibilities include the scheduling and set up of mainframe batch job streams, providing user id and password support, maintenance of the technical library and providing CD burning services.

Services are delivered within existing divisional, ACSC, ministry, and Alberta Government Business Plan goals, objectives, strategies, and targets. The production controller contributes to the success of the division by providing timely, authorized, and accurate production processing services.

Responsibilities and Activities

(Purpose of the job can be broken down in different responsibilities and end results. Each end result shows what the job is accountable for, within what framework, and what the added value is.)

1. Mainframe Production Systems

- Maintain and support mainframe systems:
- Scheduling and set up of batch job streams
- JCL changes

- Check and verify scheduling
- Confirm successful job completion
- Identify and correct error conditions.
- Balancing and logging procedures.
- Verify generated output and ensure output and invoices are distributed appropriately.
- Maintain procedural manuals and documentation for existing systems.
- Maintain mainframe account numbers and Automated Paging Facility numbers.

2. RACF Administration

- Provide user id and password support:
- Assign, update and change user id's.
- Change and reset mainframe passwords.

3. Technical Library

- Maintain a library of technical books and media for ACSC technical support personnel:
- Order software products as required.
- Maintain software support media and books, keeping versions current.
- Provide online listing of all books and media.
- Provide administrative support for CD server towers including adding and removing software, notifications for changes and keeping listing current.

4. CD Burning

Provide CD burning services:

- Burn identified software and distribute to government departments. Maintain a current list of all software distributed.
- Burn information off the network or from original CD's for archival, backup and distribution purposes.
- Map mainframe data files using FormScope and burn the information to CD.

5. Reporting

- Maintain and generate a variety of ad hoc reports.
- Generate and maintain complex graphs and spreadsheets.

Scope

(Illustrates what internal or external areas the job impacts, and the diversity, complexity, and creativity of the job.)

The production control area performs technical and administrative tasks for Government of Alberta ministries and internal IT staff. The duties performed require independence of action, judgment and initiative in a job set-up, tracing and resolving production problems, selectively manipulating or changing the job control language, and verifying job streams. Diverse skills and technical knowledge are required to provide high quality services.

Work is performed independently with a minimum of supervision and with accuracy and timeliness.

Contacts

(Main contacts of this position and the purpose of those contacts.)

The main contacts are with clients and technical support groups and the purpose is to provide timely, authorized, and accurate production processing services.

Knowledge, Skills and Abilities

(Most important knowledge factors, skills and abilities including knowledge about practical procedures, specialized techniques, etc.; analytical and conceptual skills and abilities; and skills needed for direct interaction with others not only diplomas and degrees. Specific training if it is an occupational certification/registration required for the job.)

- Knowledge of ZEKE, INFOPAC, TSO, JCL, ISPF, COM-LETE and CONTROL-D.
- Knowledge of mainframe, open systems, and oracle support operating systems.
- Knowledge of Microsoft Excel, Word, CorelDraw, Visio.
- Problem solving and resolutions skills.
- Listening and communication skills.
- Organizational and planning skills.
- Analytical and troubleshooting skills to investigate, identify and solve problems quickly and efficiently.
- Ability to be flexible and creative and to continually deal with change.
- Ability to work collaboratively as well as individually.
- Positive customer service attitude.

Organization

(Working titles of positions reporting directly to this position.)

This position has no supervisory responsibilities.

Subsidiary 1 Benchmark Job Description - 013OS02

Identification Section

Working Title:	Bindery Equipment Operator
Department:	Education
Division, Branch/Unit:	Corporate Services Division, Program Resources, Operations and Services
Reports To:	Graphic Services Supervisor, Postpress Manager
Levels to D.M.:	6

Purpose

(Brief summary of the job, covering the main responsibilities, the framework within which the job has to operate and the main contribution to the organization.)

The Bindery Equipment Operator operates a full range of mechanical binding and related equipment to finish printed material. Position will setup, operate and maintain the equipment as well as train junior operators. The position provides bindery services for a wide range of material including distance education booklets, modules, books ranging in size from 12 sheets to 15,000 sheets.

Responsibilities and Activities

(Purpose of the job can be broken down in different responsibilities and end results. Each end result shows what the job is accountable for, within what framework, and what the added value is.)

1. Setup and operate a full range of binding equipment including:

- Punch Master 20
- STL 1000 Auto Coiler
- Damark Shrink Wrapper
- Schneider 45" Programmable Cutter
- Muller Martini 21 Gathering Machine
- Auxiliary Equipment

- Rosshack No. 7 Stitcher

These machines can produce a number of different types of binding including Coil binding, Saddle Stitching and Perfect Binding (binding using glue on the spine). The equipment is very complex (including some computerized equipment and electronic control panels) and can involve complicated set up as well as continual monitoring and adjustments during the job run. Some of the equipment requires 2 people to operate.

2. For all types of binding, the position:

- Setup and operate a variety of binding equipment.
- Setup new programs for cutters.
- Change automatic coilers.
- Solve any minor maintenance problems and fix any minor equipment problems.
- Set up equipment for and train junior binding equipment operators.

3. Maintenance and keeping records.

- Perform daily, weekly and long-term preventative maintenance.
- Adjust equipment and perform minor repairs.
- Maintain daily, weekly and monthly production records.

Scope

(Illustrates what internal or external areas the job impacts, and the diversity, complexity, and creativity of the job.)

Position will setup, operate and maintain complex mechanical bindery equipment (some of which require more than one operator when a job is running). Position trains other operators.

Contacts

(Main contacts of this position and the purpose of those contacts.)

Position provides training and guidance to other Binding Equipment Operators.

Knowledge, Skills and Abilities

(Most important knowledge factors, skills and abilities including knowledge about practical procedures, specialized techniques, etc.; analytical and conceptual skills and abilities; and skills needed for direct interaction with others not only diplomas and degrees. Specific training if it is an occupational certification/registration required for the job.)

- Position requires an in-depth knowledge of bindery techniques and processes.
- Ability to meet tight deadlines and the ability to handle associated stress.
- Mechanical aptitude, good interpersonal skills and the ability to be innovative and creative.
- Typically requires a Grade XII diploma and considerable related experience.
- Journeyman certificate and/or graphic arts diploma is highly desirable.

Organization

(Working titles of positions reporting directly to this position.)

While this position has no formal supervisory responsibilities, it trains other Binding Equipment Operators.

Identification Section

Working Title:	Receiver
Department:	Education
Division, Branch/Unit:	Corporate Services, Learning Resources Centre, Warehouse Distribution
Reports To:	Warehouse Supervisor
Levels to D.M.:	6

Purpose

(Brief summary of the job, covering the main responsibilities, the framework within which the job has to operate and the main contribution to the organization.)

The Receiver is responsible for the orderly and proper receipt of a high volume of inventories for resale, supplies, materials and equipment. Position ensures the control, safekeeping, custody, accuracy and integrity of all goods received and enters control data into the system.

This position also performs other related warehousing duties and trains junior staff.

Responsibilities and Activities

(Purpose of the job can be broken down in different responsibilities and end results. Each end result shows what the job is accountable for, within what framework, and what the added value is.)

1. Position plans for, receives and stores a high volume of items.

- Unload shipments, inspect for damage, verify way bills and weigh shipments.
- Create computer generated receiving control report, and check quality and quantity of shipment against receiving checklist.

- Confirm receipt on computerized inventory management system.
- Track and trace shipments, make carrier claims, process returns and external transfers.
- File receiving documentation, carrier claims, returns and transfer documentation.
- Assist with negotiating inbound freight contracts.
- Trains support staff.

2. Shipping including packing the product, preparing shipping documentation and selecting the carrier.

- Place the finished order in the staging area, verify the number of pieces, load carrier vehicle, and prepare all hand-written and computer documentation.
- Process Canada Post shipments.
- Maintain shipping system cost centre, ensuring cost recovery for distribution services.
- Trains support staff.

3. Performs inventory management and processes/manages sales returns.

- Evaluates condition and quantity of returns.
- Provide recommendation to Customer Sales on whether to accept the return.
- Close the return.
- Control internal transfers of material and documentation related to returns.

4. Perform deliveries and courier run.

- Make local deliveries.
- Daily pickup and delivery at the Post Office, bank and intergovernmental mail.
- Meters mail.

Scope

(Illustrates what internal or external areas the job impacts, and the diversity, complexity, and creativity of the job.)

Position's primary responsibility is receiving and inventorying a high volume of items in a computerized inventory environment.

Contacts

(Main contacts of this position and the purpose of those contacts.)

Position communicates with internal and external clients concerning the status of shipments.
Provides training and guidance to junior staff.

Knowledge, Skills and Abilities

(Most important knowledge factors, skills and abilities including knowledge about practical procedures, specialized techniques, etc.; analytical and conceptual skills and abilities; and skills needed for direct interaction with others not only diplomas and degrees. Specific training if it is an occupational certification/registration required for the job.)

- Requires a solid knowledge of warehousing operations and good product knowledge.
Position requires some computer skills.
- Typically requires a Grade XII diploma and several years of warehousing experience.
Position requires a valid driver's license.

Organization

(Working titles of positions reporting directly to this position.)

Position has no formal supervisory responsibilities but is required to train junior staff.

Identification Section

Working Title:	Stockkeeper, Inmate Stores
Department:	Justice and Solicitor General
Division, Branch/Unit:	Correctional Services, Edmonton Remand Centre
Reports To:	Stockkeeper Supervisor
Levels to D.M.:	7

Purpose

(Brief summary of the job, covering the main responsibilities, the framework within which the job has to operate and the main contribution to the organization.)

Under the direction of the Stockkeeper Supervisor, maintains the Inmate Stores and is responsible for receipt, storage and issuance of inmate personal effects and recovery of clothing, bedding, toiletries and other personal items from inmates. Position also oversees the laundry operation.

Responsibilities and Activities

(Purpose of the job can be broken down in different responsibilities and end results. Each end result shows what the job is accountable for, within what framework, and what the added value is.)

1. Maintain all aspects of Inmate Stores Operations.

- Receive and issue clothing, bedding, toiletry items and tobacco.
- Complete documentation respecting the receipt and release of inmate property, including the issue.
- Store and safeguard inmate property and personal effects.
- Maintain contact with other provincial and federal institutions regarding shipping and receiving inmate property.
- Ensure stock levels of institutional clothing, bedding and toiletries are maintained.

- Respond to public inquiries such as queries about property and transport of cell effects.
- Prepares all courts and transfers as required and ensures all property and documentation match for release.
- Complete any problem solving that may be required by the department.
- Daily spot checks to ensure all areas of Inmate Stores are adequate.
- Maintains contact with public inquiries, i.e. property, transport of cell effects.
- Identifies areas of weakness to supervisor for its action.
- Identifies and takes corrective action related to Inmate Stores.

2. Maintain outside laundry operations.

- Ensure laundry is sorted prior to shipping out of the Centre for cleaning.
- Shelve clean laundry upon return delivery to Centre.
- Perform a weekly reconciliation of in and out laundered items.

3. Maintain in-house laundry operations.

- Operate in-house washers and dryers.
- Ensure adequate laundry supplies are maintained.

4. Prepare condemning board reports.

- Ensure condemning board reports are done weekly by proper documenting and sorting of items for disposal.

5. Prepare institutional clothing for repair as required.

- Sort and identify clothing requiring outside repair.
- List and box mending for transport to tailors.

6. Any other related duties as required by the department.

Scope

(Illustrates what internal or external areas the job impacts, and the diversity, complexity, and creativity of the job.)

- Provide services in an institutional facility to inmates, staff and outside agencies.

- Must utilize Policies and Procedures and Standing Operating Procedures to ensure the safety and well-being of staff, inmates and outside agencies.
- Must provide proper handling of inmate property.
- Maintain contact with public/outside agencies inquiries, i.e. property, inmate cell effects.
- Maintain contact with other provincial and federal institutions regarding inmate property.
- Other related duties as assigned.

Contacts

(Main contacts of this position and the purpose of those contacts.)

Communication is primarily a straightforward exchange of routine information between inmates, staff, outside agencies and the public.

Knowledge, Skills and Abilities

(Most important knowledge factors, skills and abilities including knowledge about practical procedures, specialized techniques, etc.; analytical and conceptual skills and abilities; and skills needed for direct interaction with others not only diplomas and degrees. Specific training if it is an occupational certification/registration required for the job.)

Requires knowledge of:

- Edmonton Remand Centre Standard Operating Procedures.
- Freedom of Information and Protection of Privacy Act.
- Adult Centre Policies and Procedures.
- Correctional Offender Management Information System.
- Typically requires a Grade X diploma and some Stores related experience.
- Good communication and documentation skills.
- Requires knowledge of an institutional facility.
- Requires knowledge in the operation of laundry machinery.

Organization

(Working titles of positions reporting directly to this position.)

This position has no supervisory responsibilities.

The logo for the Government of Alberta, featuring the word "Alberta" in a stylized, cursive script font, followed by a small square icon.

- Accurately record, verify, and prepare tapes for shipment to/from offsite locations. Ensure the correct authorizations are met and the printed reports are sent with the appropriate tapes.
- Insert and import the correct number of scratch tapes into the Magstar 3494 Tape Library for each tape pool.
- Accurately file all offsite storage tapes.
- Ensure sufficient supplies of scratch tapes are available for each tape pool.
- Investigate and correct tape problems.
- Maintain the tape rehabilitation program, ensuring tapes are labeled, repaired, degaussed, replaced, or destroyed as necessary.
- Efficiently do all requested tape dumps, TPPR's, and tape initializations.
- Monitor TLMS to ensure all functions are operating efficiently.
- Accurately record and update foreign tapes. Ensure the volume serial number is acceptable and the correct information is available before the tape is accepted for processing.
- Correctly define or delete the foreign tape profiles from the ISPF RACF panels. The tapes are cleaned or filed and the user is notified of any problems.
- Audit the foreign tape library once a week to ensure the foreign tapes coincide with the RACF panels.

2. Communication

- Provide concise accurate information to internal and external clients.
- Establish good working relationships and open communications with internal and external clients, following up on user problems and establishing procedures to eliminate or reduce the number of incidents.
- Carry out client requests in a fast, efficient and courteous manner.
- Handle effectively and efficiently difficult and unhappy clients.

Scope

(Illustrates what internal or external areas the job impacts, and the diversity, complexity, and creativity of the job.)

The Tape Library provides information, support, and direction to clients on magnetic tapes and tape management software. The overall objective is to efficiently maintain and manage corporate data for all ministries. Diverse skills and technical knowledge are required to provide high quality services.

Work is performed independently with a minimum of supervision and with accuracy and timeliness.
