

How to fill out Green CWD labels

Deer head label submission information

Things to remember BEFORE filling out a green label

A green Chronic Wasting Disease (CWD) label is essential for us to track each deer head and send results back to you. Before filling out a green label, consider the following:

- No green label = no test. You must fill out and submit a green label on each deer head in order to receive a CWD test result.
- Heads with or without a skull cap can be tested.
- Submit just the head – REMOVE ALL OF THE NECK.
- Fill out **both** sides of the label (see below for details).
- Precise location of the kill site is required: GPS (UTM) or SEC/TWP/RGE or Latitude/Longitude, in addition to the WMU. Be prepared to include this information when you fill out the label.
- Attach label securely to the ear or jaw of the head. Remember to keep the bottom portion of the label.

Fill out BOTH SIDES OF THE LABEL

Hunter/harvester information (front of label)

Alberta Fish and Wildlife
Alberta Chronic Wasting Disease Program

Name: _____
Address: _____
Town: _____ Postal Code: _____
Phone Number: _____
WIN #: _____, or
Treaty or Métis #: _____
Tag #: _____

COMPLETION OF ENTIRE LABEL IS ESSENTIAL
PLEASE SUBMIT HEAD AND ATTACH THIS LABEL
(Please complete other side)

Alberta Fish and Wildlife
Alberta Chronic Wasting Disease Program

PLEASE LEAVE THIS PORTION OF THE LABEL ATTACHED TO HEAD
USE PENCIL ONLY

YOU KEEP THIS PORTION
For your reference, write your Tag# here:
Tag #: _____
See reverse for information on how to obtain results

CWD-152352

ATTACH THIS PORTION TO THE HEAD

It contains all the information we need to get results back to you.

Ensure label is attached to head before sealing the bag so that the label and head do not get separated.

YOU KEEP THIS PORTION

Results will link the CWD number to a particular deer.

You may want to track each CWD number assigned to each animal you harvest.

Deer information (back of label)

PLEASE LEAVE THIS PORTION OF THE LABEL ATTACHED TO HEAD
USE PENCIL ONLY

YOU KEEP THIS PORTION
For information about CWD, visit www.alberta.ca
Hunters are notified when results are done.

← Your sample number

This information is critical for analysis of CWD surveillance data.

Provide ALL information about species, kill date, and sex of harvested animal.

Provide kill location as Wildlife Management Unit (WMU) AS WELL AS

- Legal land location OR
- Latitude/longitude (decimal degrees please!) OR
- UTM

It is just as important to know where CWD does NOT occur. Please do your best in determining the kill location and recording it.

Thank you for supporting the Alberta CWD Surveillance Program
