

# S131 Online Module 10: Fireline Patrol and Mop-up (CIFFC)

## Overview/Description

This course will teach you the processes used for mop – up and fireline patrol used in the Alberta wildfire fire fighting structure. After completing this course you will be able to:

- Describe the objective of mop-up.
- Define the term “hot spot” as it applies to mop-up operations
- Describe mop-up procedures.
- Identify the hazards associated with performing mop-up operations.
- Identify observation techniques for carrying out a fireline patrol.
- List problem areas to watch for in patrol observations.
- Define the purpose and requirements of fireline patrol
- Identify the appropriate action to be taken when a problem area is encountered.
