

# S131 Online Module 3: Fire Behaviour Fundamentals (CIFFC)

## Overview/Description

This online course will allow you identify different fire behaviors and the different elements that make up a fire.

You will also learn about the three methods of heat transfer, the six fire behavior terms used to describe fire spread and the different types of wildfires.

This course is very informative in the fine details of fire and just how different elements, slopes, moistures and more can affect the size and speed a wildfire.
