

S131 Online Module 4: Fire Suppression (CIFFC)

Overview/Description

This online course will teach you the basics of fire suppression. All fires are different and in order to fight a fire you will need to identify the parts of a fire. There are many different terms used in wildfire suppression that will be taught in this course.

After completing this course you will be able to:

- Provide examples of suppression action used to break the fire triangle.
- List the five basic steps of fire suppression
- Identify the fire intensity classes and to attack the fire safely and efficiently.
- Provide examples of suppression action used to break the fire triangle.
