

Assessing Timber Utilization in Active Harvesting Operations

Overview/Description

This online course is a prerequisite for FOMP training. It provides an introduction to assessing timber utilization as part of a FOMP inspection.

Topics include:

Referencing utilization standards and OGRs, ocular evaluations, sampling methods, and determining the need for a full survey.

Target Audience

Forestry Division employees.

Prerequisites

There are no prerequisites.

Registration

Forestry Division employees can register following instructions on the [WF launch page](#).
