

The Canada and Alberta BSE Surveillance Program (CABSESP)

Certification Session for Veterinarians

Wednesday, June 7th, 2023
8:30 a.m. – 2:00 p.m.

Hosted by Alberta Agriculture and Irrigation (AGI)
and
the Canadian Food Inspection Agency (CFIA) at:
Room 936, O.S. Longman Building
6909 - 116 Street, Edmonton, Alberta, T6H 4P2

The CABSESP is unique in Canada in that on-farm assessment for BSE surveillance is performed by certified veterinarians. Registered Alberta veterinarians who want to participate in the CABSESP are required to attend a *Certification Session*. Classroom presentations discuss global implications of BSE, provide a description of the program, and describe conditions for on farm implementation. A wet lab training demonstrates sample collection, identification, and delivery processes.

Graduates from the UCVM who attended the BSE pre-certification session during the regulatory medicine course are not required to attend this session. Please contact Dr. Chunu Mainali if you are pre-certified and would like to request full certification.

The CABSESP certification session is offered at no cost and CE credits will be recognized (where applicable). Registration is required to participate in this session. Please fill in the following information and return via email or fax by **June 2nd 2023**. If emailing, please send it to Chunu.Mainali@gov.ab.ca and Carolyn.Jamieson@gov.ab.ca. If faxing, send it to (780) 644-2050.
