

Graphical Land Information Management Planning System (GLIMPS) Data files – Details

Files are produced from the Graphical Land Information Management Planning System (GLIMPS) in CSV (comma separated value) format.

The record layouts and additional material regarding GLIMPS can be accessed at the following link:
<https://www.alberta.ca/assets/documents/energy-ami-data-extracts-details.pdf>

The cost for the complete data file for surface is \$1250.00 and is accessed through the [Electronic Transfer System \(ETS\)](#) with a secured password.

Daily update files in the same format as the complete data files are also available at a cost of \$650.00 per month. The daily update files include all updates performed on GLIMPS on a particular day. The daily update files include the date within the file name and are retained on the ETS site for a period of 30 days. Prior to utilizing the daily update file the requestor's database must be loaded with a complete data file.

At the end of each month, two zip files of surface data are produced.

The LSAS_TAPE_MONTHLY_<Date>.zip file will extract to the following folder configuration and files:
