How to generate a Land Use Reservation report by reservation number

Introduction

Early in the planning phases, an applicant may choose to generate a Land Use Reservation report of a general area that will provide reservation information to the applicant that may be intersected by their activity. This report will inform an applicant of which reservations that may have restrictions that could prevent an application of a specific activity or sector. Identification of reservations early in the planning process will assist applicants in selecting an appropriate area to place activities that will be later informed through Landscape Analysis Tool (LAT) report or OneStop application processes.

If a Land Use Reservation report is not generated, at time of application through the requirement of generating a LAT Report or submission through OneStop, any reservations intersected by proposed activity will be identified and any associated Action(s) associated to that Sector will need to be addressed.

The following instructions will explain how you generate a Land Use Reservation report if you have identified reservation numbers for the current reservation type (CLR) or historical types (PNT, CNC, CNT, etc.) and you are preparing a regulatory application for a particular activity.

Instructions

Reservation report by ATS

1. Click this link – [Reservation report by reservation number](#).
2. To search by reservation number, click on the “V” symbol next to the “Reservation Number” textbox, and enter a reservation number. Historical and current reservation numbers can both be used.

3. Multiple reservation numbers can be entered on separate lines. To enter multiple reservation numbers, press “Enter” after each reservation number.

4. Next, click on the “V” symbol next to the textbox “Generated By”, and enter your name.

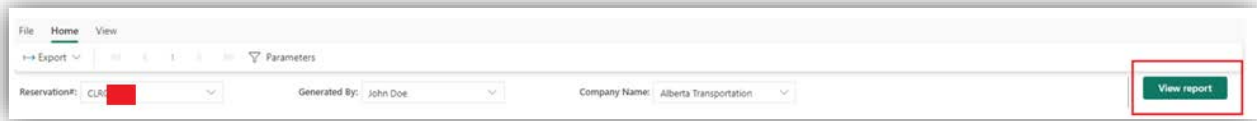

A screenshot of a web form showing a dropdown menu for 'Generated By' with 'John Doe' selected. The dropdown is highlighted with a red box. To the right, there is a 'Company Name' dropdown menu.

5. Click on “V” symbol next to the textbox “Company name” and enter your company name.

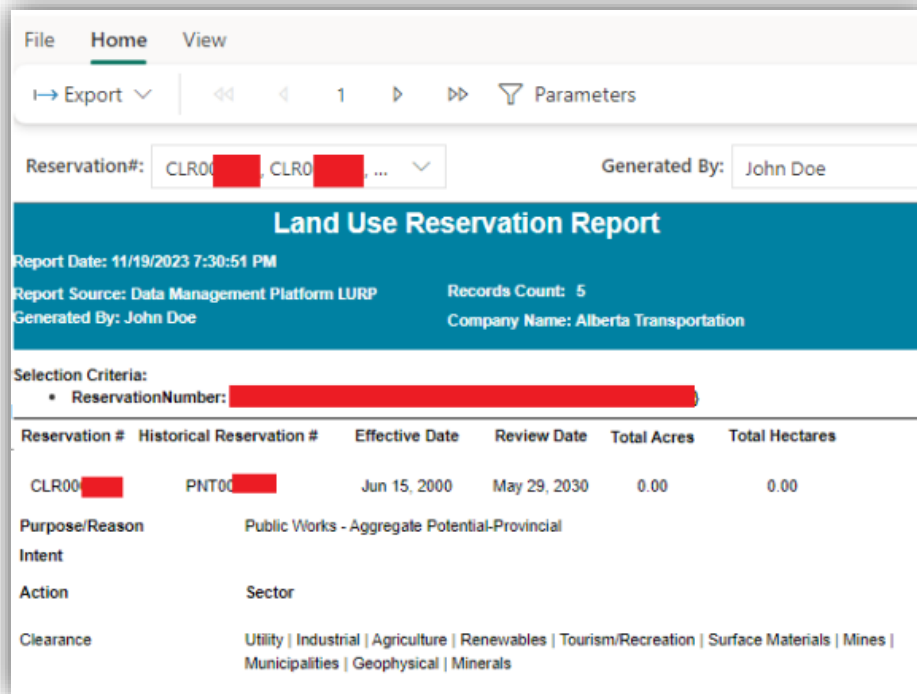

A screenshot of a web form showing a dropdown menu for 'Company Name' with 'Alberta Transportation' selected. The dropdown is highlighted with a red box. To the left, there is a 'Generated By' dropdown menu.

6. Finally, click the button “View Report”.

A screenshot of a web form showing a 'View report' button highlighted with a red box. The form includes fields for 'Reservation#' (CLR00), 'Generated By' (John Doe), and 'Company Name' (Alberta Transportation).

7. Search results and search criteria will be displayed below.

A screenshot of a web application showing a 'Land Use Reservation Report'. The report includes a table with columns for Reservation #, Historical Reservation #, Effective Date, Review Date, Total Acres, and Total Hectares. The report also includes a 'Selection Criteria' section and a 'Clearance' section.

Reservation #	Historical Reservation #	Effective Date	Review Date	Total Acres	Total Hectares
CLR00	PNT00	Jun 15, 2000	May 29, 2030	0.00	0.00

Selection Criteria:

- ReservationNumber: [Redacted]

Clearance: Utility | Industrial | Agriculture | Renewables | Tourism/Recreation | Surface Materials | Mines | Municipalities | Geophysical | Minerals

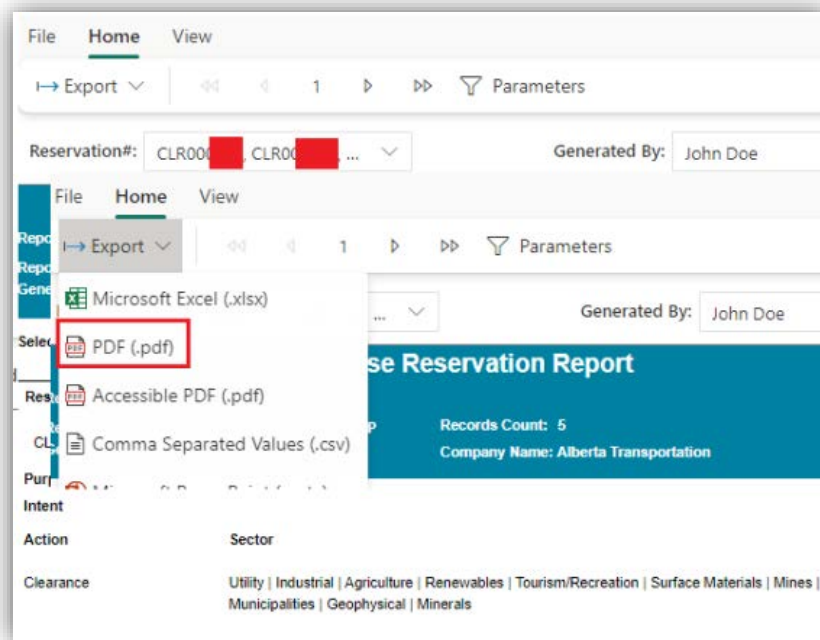

8. To move between different search results pages, use buttons << (first page), < (previous page), > (next page), >> (last page):

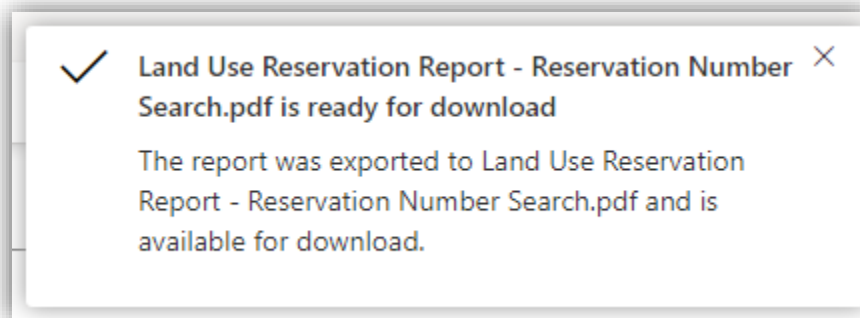

You can also enter page number between < and > to display reservations on that page.

9. To export search results, click “Export” -> “PDF”. Both search criteria and search results will appear in the exported PDF file.

10. The following popup will appear when the export is completed:
