

ARLO - Searching in and Exploring the Map

August 2026 Release - Reference Guide

This **Reference Guide** provides an overview of new and enhanced map features introduced in the **Alberta Registry for Land Online (ARLO)** August 2026 release. It helps users understand **how to use these features in the ARLO Parcel Map**, and how these functions support common tasks.

This guide is designed to support ARLO users to navigate new or updated ARLO capabilities. It is equipped with easy-to-follow instructions and helpful visual aids.

Table of Contents

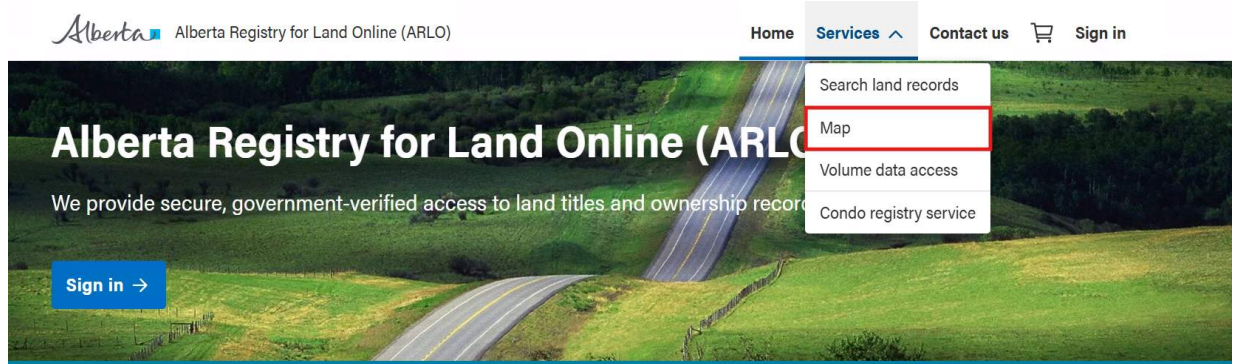

-  1. Find Non-Patent Sheets on the Map
-  2. Clear Selected Results and Map Selections
-  3. View, Pin, and Locate 3TM and UTM Coordinates

1. Find Non-Patent Sheets on the Map

Instructions

You can find a non-patent sheet from the map just like you would find any other title using Product search.

From the ARLO menu, select **Services**, then **Map**

1

Select **Titles** from the **Select product type** options (selected by default)

2

Choose a selection from the **Select search type** options. Available options are listed in the below screenshot

3

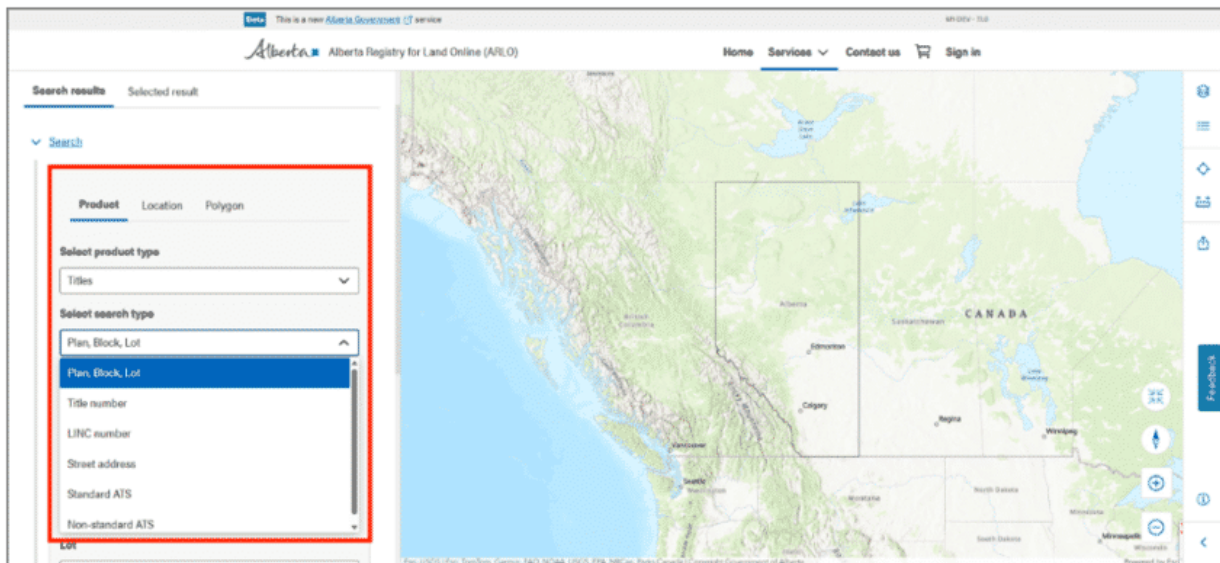

When changing the search type, the fields below will update automatically

4

Enter the indicated search criteria

5

Click the **Search** button

Non-patent sheets will be returned accordingly as indicted by the **Title type field**. From here, you can add a non-patent sheet to the cart or preview it just like any other title.

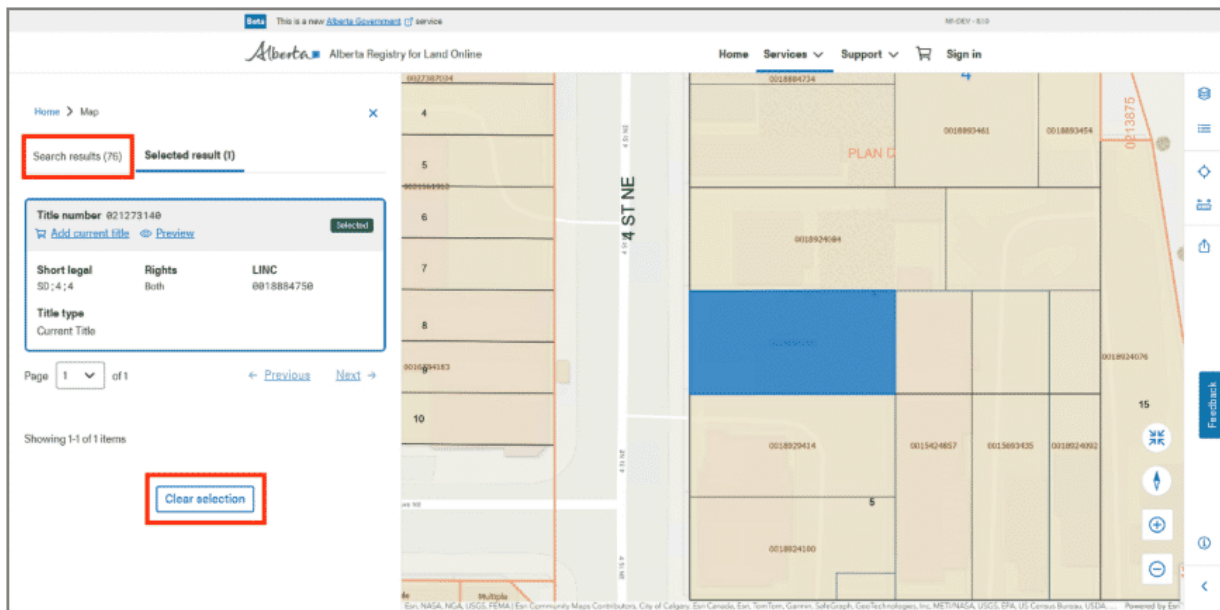

2. Clear Selected Results and Map Selections

Instructions

1

Clear Selected Results

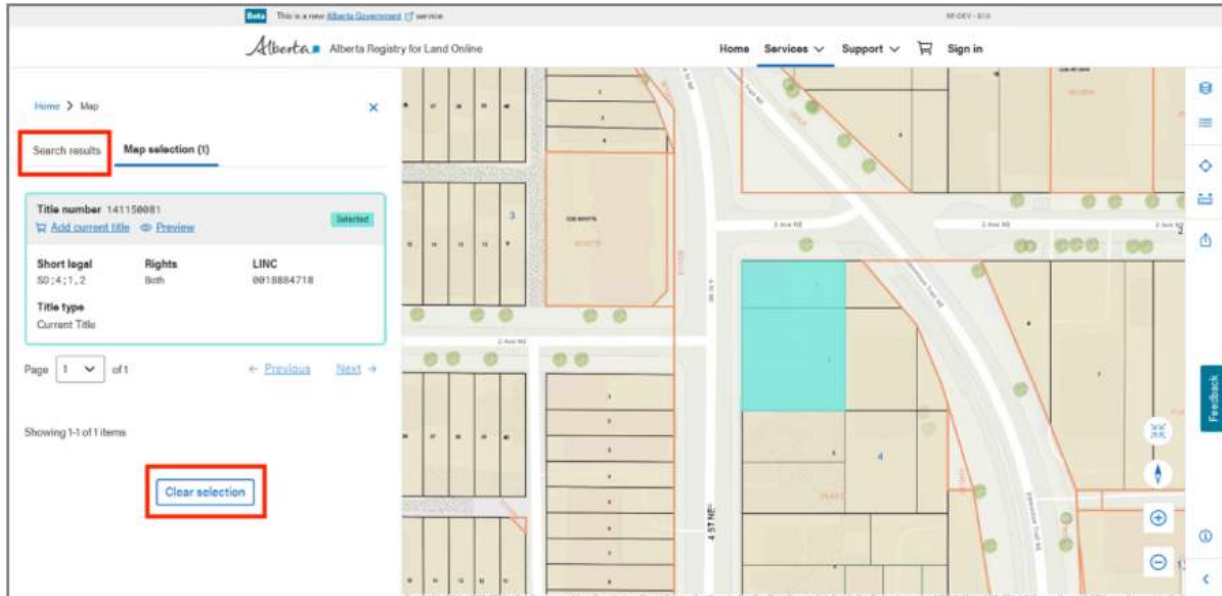

Once you've selected a search result, click the **Clear selection** button or the **Search results** tab to remove the selected item's highlight(s) from the map and return to the search results.

2

Clear Map Selections

Once you've selected an item from the map, click the **Clear selection** button or the **Search results** tab to clear the map selection.

3. View, Pin, and Locate 3TM and UTM Coordinates

Instructions

You can now view and search for 3TM and UTM coordinates.

1

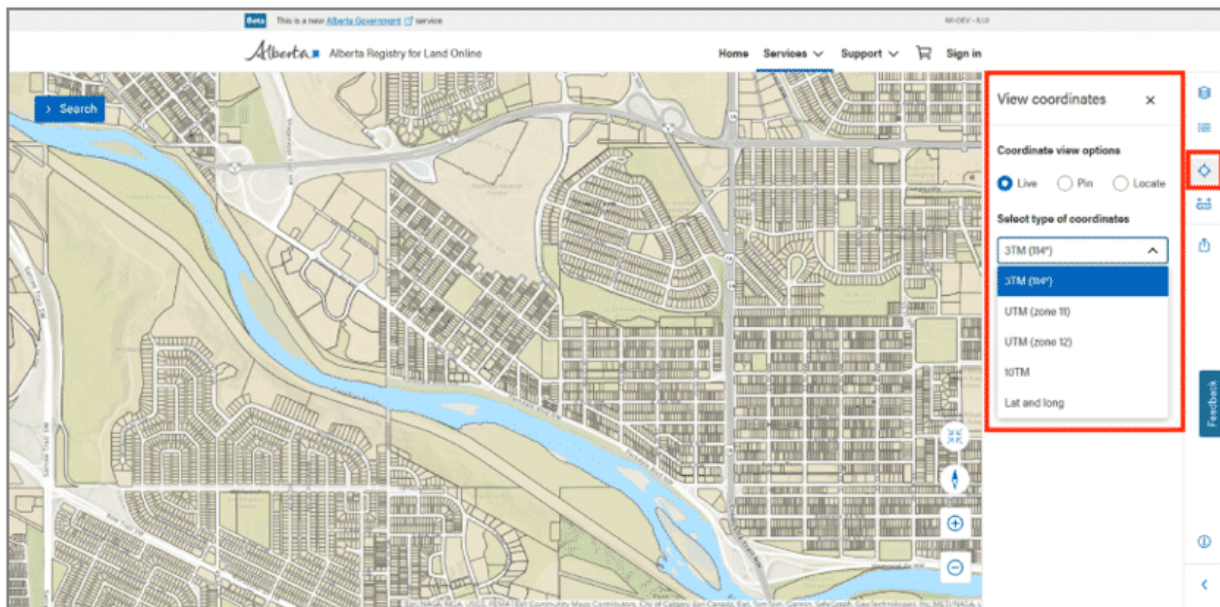

Open the **Coordinates tool** from the right side of the map

2

Select the **Live, Pin or Locate** option

3

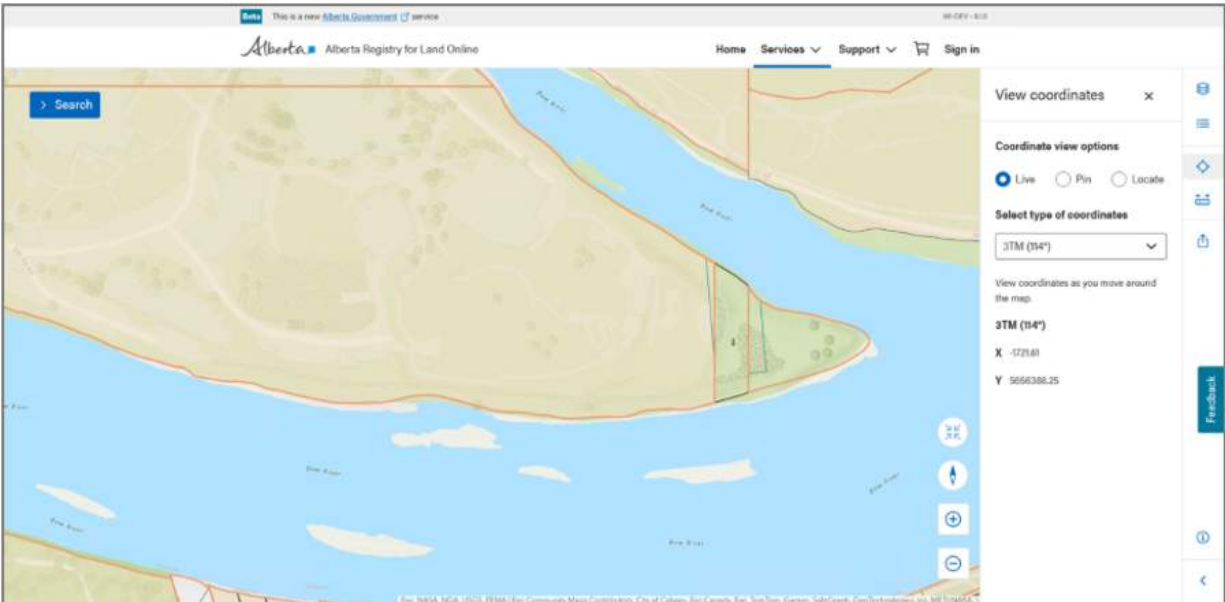

Select the type of coordinates to display

1

Live Coordinates

When viewing **Live** coordinates, the selected values display as you move your mouse around the map.

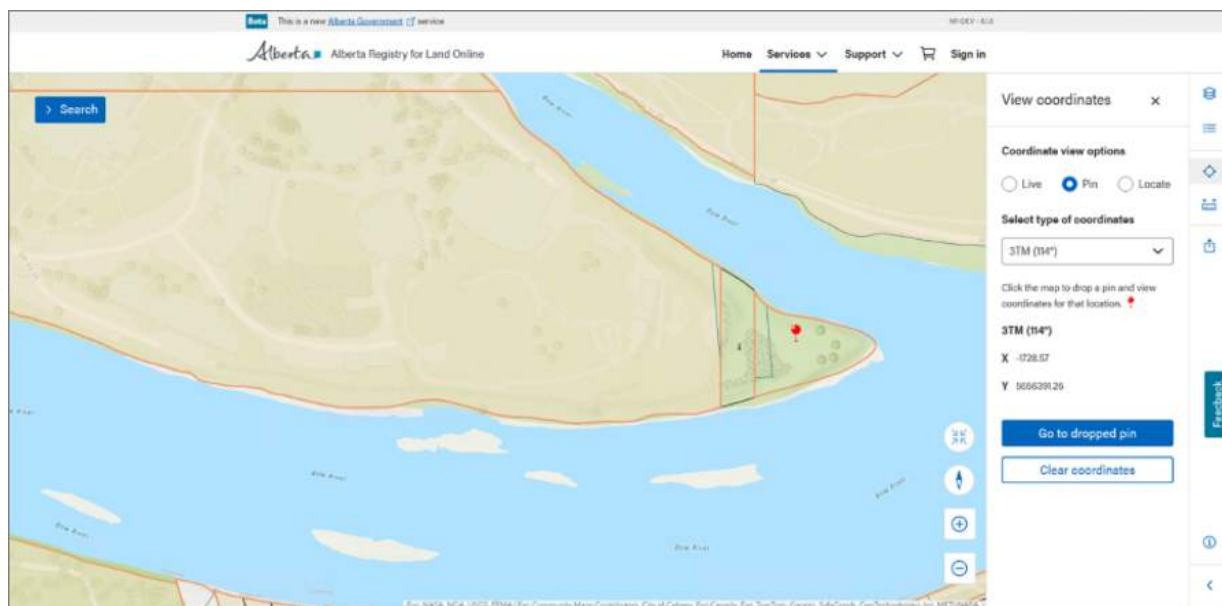

2

Pin Coordinates

When using the **Pin** option, click on the map to drop a pin and view the coordinate values for that location.

If you move the map away from the dropped pin, select **Go to dropped pin** to recenter the dropped pin on the map.

Select **Clear coordinates** to drop another pin.

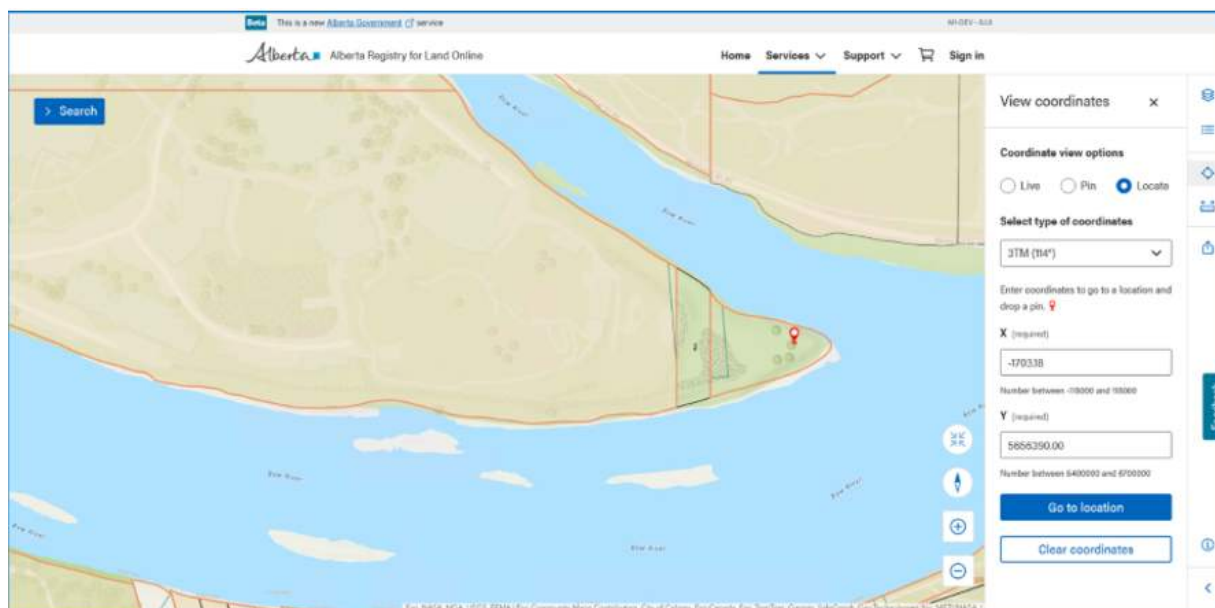

3

Locate Option

When using the **Locate** option, the input fields will update depending on the type of coordinates selected. Enter the indicated values, select **Go to location**, and the map will zoom to the location and drop a pin.

If you move the map away from the located pin, select **Go to location** to recenter the located pin on the map.

Select **Clear coordinates** to search for another coordinate location.
