

# Freehold Mineral Tax (FMT)

## An Overview of the Electronic Transfer System

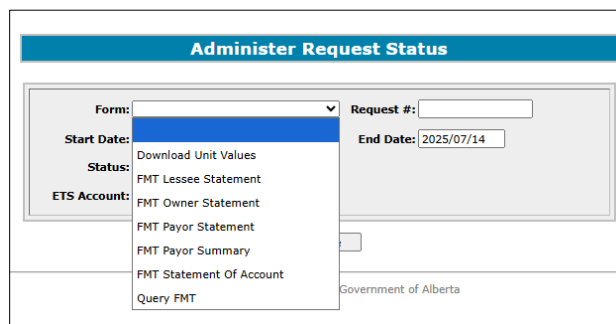

The Electronic Transfer System, also known as ETS, is the interface that allows FMT clients to:

- Query their own production entity (PE) data
- Add and delete roles
- Transfer roles between Payor, PE Administrator, and Lessee
- Download and submit unit values
- Manage their work in progress tasks, such as role transfers, and
- Download various statements.

## Statements

FMT clients can download copies of their annual Tax Statements and Payor Summary report which are used when submitting payment to Tax & Revenue Administration (TRA).

## Training Materials

ETS also has links to training materials that will guide you on how to download documents, transfer roles, monitor your work in progress requests, and more.
