

FLASHING LIGHTS?

SLOW DOWN. MOVE OVER.

New rules to protect roadside workers.

Effective September 1, 2023

When you see first responders, tow trucks or highway maintenance vehicles with flashing lights, stopped on the side of the road, you must move over to the far lane to give workers extra space. If you can't safely move over, you must slow to at least 60km/h, or the posted speed limit, whichever is lower.
