

Water for Life (W4L)

Eligibility guidelines schematic – Regional wastewater projects

Legend

- Raw sewage lines
- Treated sewage (effluent) lines
- Eligible projects are within dashed lines
- W4L [Water for Life \(https://www.alberta.ca/water-life-program\)](https://www.alberta.ca/water-life-program)
- AMWWP Alberta Municipal Water Wastewater Partnership [\(https://www.alberta.ca/amwwp-apply\)](https://www.alberta.ca/amwwp-apply)

Notes:

1. Eligible projects are those that carry 100% of the flow as indicated within dashed lines.
2. Wastewater lines prior to lift stations are not eligible (lines upstream from lift station). However, 100% flow trunk lines connecting to lift stations are eligible under AMWWP.
3. Refer to Water for Life website for a complete list of eligible applicants and projects.
4. Wastewater (sewage) collection systems are not eligible for funding.
5. Upgrades to existing systems are eligible on a weighted rate using AMWWP formulas.
6. As each project is unique, applicants should consult the corresponding TEC regional office.
